A. The city shall not refund or credit any taxes voluntarily paid without written protest at the time of payment in the event that a locally imposed and administered tax is declared invalidly enacted or unconstitutional by a court of competent jurisdiction. However, a taxpayer shall not be deemed to have paid the tax voluntarily if the taxpayer lacked knowledge of the facts upon which to protest the taxes at the time of payment or if the taxpayer paid the taxes under duress.

B. The statute of limitations on a claim for credit or refund shall be three (3) years after the end of the calendar year in which payment in error was made. (Ord. 547, 12-6-2000)

C. The taxpayer may request an extension of time to have an audit conducted. The audit shall be conducted not less than seven (7) days nor more than thirty (30) days from the date the notice is given, unless the taxpayer and the local tax administrator agreed to some other convenient time. In the event the taxpayer is unable to comply with the audit on the date in question, the taxpayer may request another date within the thirty (30) days, approved in writing, that is convenient to the taxpayer and the local tax administrator.

D. Every taxpayer shall keep accurate books and records of the taxpayer's business or activities, including original source documents and books for entry denoting the transactions which had given rise or may have given rise to any tax liability, exemption or deduction. All books shall be kept in the English language and shall be subject to and available for inspection by the city.

E. It is the duty and responsibility of every taxpayer to make available its books and records for inspection by the city. If the taxpayer fails to provide the documents necessary for audit within the time provided, the local tax administrator may issue a tax determination and assessment based on the tax administrator's determination of the best estimate of the taxpayer's tax liability.

F. If an audit determines there has been an overpayment of a locally imposed and administered tax as a result of the audit, written notice of overpayment shall be given to the taxpayer within thirty (30) days of the city's determination of the amount of overpayment.

G. In the event a tax payment was submitted to the incorrect local tax administrator shall notify the local government entity imposing such tax. (Ord. 547, 12-6-2000)

1-11-9: APPEAL:

A. The local tax administrator shall send written notice to a taxpayer upon the local tax administrator's issuance of a protestable, notice of tax due, a bill, a claim denial, or a notice of claim reduction regarding any tax. The notice shall include the following information:

The written protest and petition for hearing must be filed with the local tax administrator within forty five (45) days of receipt of the written notice of the tax determination and assessment.

C. If a timely written notice and petition for a hearing is filed, the local tax administrator shall fix the time and place for hearing and shall give written notice to the taxpayer. The hearing shall be scheduled for a date within fourteen (14) days of receipt of the written protest and petition for hearing, unless the taxpayer requests a later date convenient to all parties.

D. If a written protest and petition for hearing is not filed within the forty five (45) day period, the tax determination, audit or assessment shall become a final bill due and owing without further notice.

E. Upon the showing of reasonable cause by the taxpayer and the full payment of the contested tax liability along with interest accrued as of the due date of the tax, the local tax administrator may reopen or extend the time for filing a written protest and petition for hearing. In no event shall the time for filing a written protest and petition for hearing be reopened or

extended for more than ninety (90) days after the expiration of the forty five (45) day period. (Ord. 547, 12-6-2000)

1-11-10: HEARING:

A. Whenever a taxpayer or a tax collector has filed a timely written protest and petition for hearing under section 1-11-9 of this chapter, the local tax administrator shall conduct a hearing regarding any appeal.

B. No continuances shall be granted except in cases where a continuance is absolutely necessary to protect the rights of the taxpayer. Lack of preparation shall not be grounds for a continuance. Any continuance granted shall not exceed fourteen (14) days.

C. At the hearing the local tax administrator shall preside and shall hear testimony and accept any evidence relevant to the tax determination, audit, or assessment. The strict rules of evidence applicable to judicial proceedings shall not apply.

D. At the conclusion of the hearing, the local tax administrator shall make a written determination on the basis of the evidence presented at the hearing. The taxpayer or tax collector shall be provided with a copy of the written decision. (Ord. 547, 12-6-2000)

1-11-11: INTEREST AND PENALTIES:

In the event a determination has been made that a tax is due and owing, through audit, assessment or other bill sent, the tax must be paid within the time frame otherwise indicated.

A. Interest: The city hereby provides for the amount of interest to be assessed on late payment, underpayment, or nonpayment of the tax, to be six percent (6.0%) per annum, based on a year of three hundred sixty five (365) days and the number of days elapsed.

B. Late Filing And Payment Penalties: If a tax return is not filed within the time and manner provided by the controlling tax ordinance, a late filing penalty, of five percent (5%) of the amount of tax required to be shown as due on a return shall be imposed; and a late payment penalty of five percent (5%) of the tax due shall be imposed. If no return is filed within the time or manner provided by the controlling tax ordinance and prior to the city issuing a notice of tax delinquency or notice of tax liability, then a failure to file penalty shall be assessed equal to fifteen percent (15%) of the total tax due for the applicable reporting period for which the return was required to be filed. A late filing of payment penalty shall not apply if a failure to file penalty is imposed by the controlling ordinance. (Ord. 547, 12-6-2000)

1-11-12: ABATEMENT:

The local tax administrator shall have the authority to waive or abate any late filing penalty, late payment penalty or failure to file penalty if the local tax administrator shall determine reasonable cause exists for delay or failure to make a filing. (Ord. 547, 12-6-2000)

1-11-13: INSTALLMENT CONTRACTS:

The city may enter into an installment contract with the taxpayer for the payment of taxes under the controlling tax ordinance. The local tax administrator may not cancel any installment contract so entered unless the taxpayer fails to pay any amount due and owing. Upon written notice by the local tax administrator that the payment is thirty (30) days delinquent, the taxpayer shall have fourteen (14) working days to cure any delinquency. If the taxpayer fails to cure the delinquency within the fourteen (14) day period or fails to demonstrate good faith in reconstructing the installment contract with the local tax administrator, the installment contract shall be canceled without further notice to the taxpayer. (Ord. 547, 12-6-2000)

1-11-14: STATUTE OF LIMITATIONS:

The city, through the local tax administrator, shall review all tax returns in a prompt and timely manner and inform taxpayers of any amount due and owing. The taxpayer shall have forty five (45) days after receiving the notice of the reviewed tax returns to make any request for refund or provide any tax still due and owing.

A. No determination of tax due and owing may be issued more than four (4) years maximum after the end of the calendar year for which the return for the applicable period was filed or for the calendar year in which the return for the applicable period was due, whichever occurs later.

B. If any tax return is not filed or if during any four (4) year period for which a notice of tax determination or assessment may be issued by the city, the tax paid is less than seventy five percent (75%) of the tax due, the statute of limitations shall be six (6) years maximum after the end of the calendar year in which return for the applicable period was due or end of the calendar year in which the return for the applicable period was filed.

C. No statute of limitations shall apply if a fraudulent tax return was filed by the taxpayer. (Ord. 547, 12-6-2000)

1-11-15: VOLUNTARY DISCLOSURE:

For any locally imposed and administered tax for which a taxpayer has not received a written notice of an audit, investigation, or

assessment from the local tax administrator, a taxpayer is entitled to file an application with the local tax administrator for a voluntary disclosure of the tax due. A taxpayer filing a voluntary disclosure application must agree to pay the amount of tax due, along with interest of one percent (1%) per month, for all periods prior to the filing of the application but not more than four (4) years before the date of filing the application. A taxpayer filing a valid voluntary disclosure application may not be liable for any additional tax, interest, or penalty for any period before the date the application was filed. However, if the taxpayer incorrectly determined and underpaid the amount of tax due, the taxpayer is liable for the underpaid tax along with applicable interest on the underpaid tax, unless the underpayment was the result of fraud on the part of the taxpayer, in which case the application shall be deemed invalid and void. The payment disclosure application or the date agreed to by the local tax administrator. However, any additional amounts owed as a result of an underpayment of tax and interest previously paid under this section must be paid within ninety (90) days after a final determination and the exhaustion of all appeals of the additional amount owed or the date agreed to by the local tax administrator, whichever is longer. (Ord. 547, 12-6-2000)

1-11-16: PUBLICATION OF TAX ORDINANCES:

Any locally administered tax ordinance shall be published via normal or standard publishing requirements. The posting of a tax ordinance on the internet shall satisfy the publication upon request at the city clerk's office. (Ord. 547, 12-6-2000)

1-11-17: INTERNAL REVIEW PROCEDURE:

The local tax administrator shall establish an internal review procedure regarding any liens filed against any taxpayers for unpaid taxes. Upon a determination by the local tax administrator that the lien is valid, the lien shall remain in full force and effect. If the lien is determined to be improper, the local tax administrator shall:

- A. Timely remove the lien at the city's expense;
- B. Correct the taxpayer's credit record; and
- C. Correct any public disclosure of the improperly imposed lien. (Ord. 547, 12-6-2000)

1-11-18: APPLICATION:

This chapter shall be liberally construed and administered to supplement all of the city's tax ordinances. To the extent that any tax ordinance is in conflict with or inconsistent with this chapter, this chapter shall be controlling. (Ord. 547, 12-6-2000)

CHAPTER 14

SEXUAL HARASSMENT¹

SECTION:

- 1-14-1: Prohibition On Sexual Harassment
- 1-14-2: Definition Of Sexual Harassment
- 1-14-3: Procedure For Reporting An Allegation Of Sexual Harassment
- 1-14-4: Prohibition On Retaliation For Reporting Sexual Harassment Allegations
- 1-14-5: Consequences Of A Violation Of The Prohibition On Sexual Harassment
- 1-14-6: Consequences For Knowingly Making A False Report

1-14-1: **PROHIBITION ON SEXUAL HARASSMENT:**

It is unlawful to harass a person because of that person's sex. The courts have determined that sexual harassment is a form of discrimination under Title VII of the U.S. Civil Rights Act of 1964, as amended in 1991. All persons have a right to work in an environment free from sexual harassment. Sexual harassment is unacceptable misconduct which affects individuals of all genders and sexual orientations. It is a policy of the City of Assumption to prohibit harassment of any person by any municipal official, municipal agent, municipal employee, municipal agency or municipal office on the basis of sex or gender. All municipal officials, municipal agents, municipal employees and municipal agencies or municipal offices are prohibited from sexually harassing any person, regardless of any employment relationship or lack thereof. (Ord. 734, 11-7-2018; amd. Ord. 758, 6-3-2020)

1-14-2: **DEFINITION OF SEXUAL HARASSMENT:**

This policy adopts the definition of sexual harassment as stated in the Illinois Human Rights Act, which currently defines sexual harassment as:

- A. Any unwelcome sexual advances or requests for sexual favors or any conduct of a sexual nature when:

October 2020

1. This policy was drafted using the Illinois Department of Human Rights Sexual Harassment Model Policy and has been modified to conform to Public Act 100-0554 and Public Act 101-0221. The provisions of this policy will apply only insofar as they do not conflict with any State or Federal law.

1. Submission to such conduct is made a term or condition of an individual's employment, either explicitly or implicitly;
 2. Submission to or rejection of such conduct by an individual is used as the basis for employment decisions affecting such individual; or
 3. Such conduct has the purpose or effect of substantially interfering with an individual's work performance or creating an intimidating, hostile or offensive working environment.
- B. Conduct which may constitute sexual harassment includes, but is not limited to:
1. Verbal Harassment: Sexual innuendos, suggestive comments, insults, humor, jokes about sex, anatomy or gender-specific traits, sexual propositions, threats, repeated requests for dates; or, statements of a sexual nature about other employees, even outside of their presence.
 2. Non-Verbal Harassment: Suggestive or insulting sounds (whistling), leering, obscene gestures, sexually suggestive bodily gestures, "catcalls," "smacking" or "kissing" noises.
 3. Visual: Posters, signs, pin-ups or slogans of a sexual nature, viewing pornographic material or websites.
 4. Physical Harassment: Touching, unwelcome hugging or kissing, pinching, brushing the body, any coerced sexual act or actual assault.
 5. Textual/Electronic Harassment: "Sexting" (electronically sending messages with sexual content, including pictures or video), the use of sexually explicit language, harassment, cyber stalking and threats via all forms of electronic communication (email/text/picture/video messages, intranet/online postings, blogs, instant messages and posts on social network websites, like Facebook and Twitter).
- C. The most severe and overt forms of sexual harassment are easier to determine. On the other end of the spectrum, some sexual harassment is more subtle and depends, to some extent, on individual perception and interpretation. The courts will assess sexual harassment by a standard of what would offend a "reasonable person." (Ord. 734, 11-7-2018; amd. Ord. 758, 6-3-2020)

1-14-3: PROCEDURE FOR REPORTING AN ALLEGATION OF SEXUAL HARASSMENT:

- A. An employee who either observes sexual harassment or believes herself/himself to be the object of sexual harassment should deal with the

October 2020

incident(s) as directly and firmly as possible by clearly communicating her/his position to the offending employee, and her/his immediate supervisor. It is not necessary for sexual harassment to be directed at the person making the report.

B. Any employee may report conduct which is believed to be sexual harassment, including the following:

1. Electronic/Direct Communication: If there is sexual harassment behavior in the workplace, the harassed employee should directly and clearly express her/his objection that the conduct is unwelcome and request that the offending behavior stop. The initial message may be verbal. If subsequent messages are needed, they should be put in writing in a note or a memo.

2. Contact With Supervisory Personnel:

a. At the same time direct communication is undertaken, or in the event the employee feels threatened or intimidated by the situation, the problem must be promptly reported to the immediate supervisor of the person making the report, a department head, a director of human resources, an ethics officer, the city manager or administrator or the chief elected official of the municipality.

b. The employee experiencing what she/he believes to be sexual harassment must not assume that the employer is aware of the conduct. If there are no witnesses and the victim fails to notify a supervisor or other responsible officer, the municipality will not be presumed to have knowledge of the harassment.

3. Resolution Outside Municipality: The purpose of this policy is to establish prompt, thorough and effective procedures for responding to every report and incident so that problems can be identified and remedied by the municipality. However, all municipal employees have the right to contact the Illinois Department of Human Rights (IDHR) or the Equal Employment Opportunity Commission (EEOC) for information regarding filing a formal complaint with those entities. An IDHR complaint must be filed within three hundred (300) days of the alleged incident(s) unless it is a continuing offense. A complaint with the EEOC must also be filed within three hundred (300) days.

4. Allegations Of Sexual Harassment Made Against An Elected Official Of The Governmental Unit By Another Elected Official Of A Governmental Unit: In addition to the methods of reporting included above, an elected official may request an independent review of a complaint of sexual harassment by another elected official. The request shall be made to the human resources director, the city manager or administrator or the chief elected official of the municipality. The official receiving the request shall take immediate action in keeping with

October 2020

the procurement process of the municipality to retain a qualified individual or entity for the independent review of the allegations of sexual harassment in violation of this policy. The outcome of the independent review shall be reported to the corporate authorities.

- C. Documentation of any incident may be submitted with any report (what was said or done, the date, the time and the location), including, but not limited to, written records such as letters, notes, memos and telephone messages.
- D. All allegations, including anonymous reports, will be accepted and investigated regardless of how the matter comes to the attention of the municipality. However, because of the serious implications of sexual harassment charges and the difficulties associated with their investigation and the questions of credibility involved, the claimant's willing cooperation is a vital component of an effective inquiry and an appropriate outcome. (Ord. 734, 11-7-2018; amd. Ord. 758, 6-3-2020)

1-14-4: PROHIBITION ON RETALIATION FOR REPORTING SEXUAL HARASSMENT ALLEGATIONS:

- A. No municipal official, municipal agency, municipal employee or municipal office shall take any retaliatory action against any municipal employee or official due to a municipal employee's or official's:
 - 1. Disclosure or threatened disclosure of any violation of this policy;
 - 2. Providing information related to an investigation or testimony before any public body conducting an investigation, hearing or inquiry into any violation of this policy; or
 - 3. Assistance with or participation in a proceeding to enforce the provisions of this policy.
- B. For purposes of this policy, retaliatory action means the reprimand, discharge, suspension, demotion, denial of promotion or transfer or change in the terms or conditions of employment of any municipal employee that is taken in retaliation for a municipal employee's or official's involvement in protected activity pursuant to this policy.
- C. No individual making a report will be retaliated against, even if a report made in good faith is not substantiated. In addition, any witness will be protected from retaliation.

- D. Similar to the prohibition against retaliation contained herein, the State Officials and Employees Ethics Act (5 ILCS 430/15-10) provides whistleblower protection from retaliatory action, and this policy prohibits retaliatory action such as reprimand, discharge, suspension, demotion, or denial of promotion or transfer that occurs in retaliation for an employee who does any of the following:
1. Discloses or threatens to disclose to a supervisor or to a public body an activity, policy or practice of any officer, member, agency or other employee that the employee reasonably believes is in violation of a law, rule or regulation;
 2. Provides information to or testifies before any public body conducting an investigation, hearing or inquiry into any violation of a law, rule or regulation by any officer, member, agency or other employee; or
 3. Assists or participates in a proceeding to enforce the provisions of the State Officials and Employees Ethics Act or this policy.
- E. Pursuant to the Whistleblower Act (740 ILCS 174/15(a)), an employer may not retaliate against an employee who discloses information in a court, an administrative hearing, before a legislative commission or committee or in any other proceeding, where the employee has reasonable cause to believe that the information discloses a violation of a state or federal law, rule or regulation. In addition, an employer may not retaliate against an employee for disclosing information to a government or law enforcement agency, where the employee has reasonable cause to believe that the information discloses a violation of a state or federal law, rule or regulation (740 ILCS 174/15(b)).
- F. According to the Illinois Human Rights Act (775 ILCS 5/6-101), it is a civil rights violation for a person, or for two (2) or more people to conspire to retaliate against a person because she/he has opposed that which she/he reasonably and in good faith believes to be sexual harassment in employment, because she/he has made a charge, filed a complaint, testified, assisted or participated in an investigation, proceeding or hearing under the Illinois Human Rights Act.
- G. An employee who is suddenly transferred to a lower paying job or passed over for a promotion after filing a complaint with IDHR or EEOC, may file a retaliation charge within three hundred (300) days of the alleged retaliation. (Ord. 734, 11-7-2018; amd. Ord. 758, 6-3-2020)

1-14-5: CONSEQUENCES OF A VIOLATION OF THE PROHIBITION ON SEXUAL HARASSMENT:

In addition to any and all other discipline that may be applicable pursuant to municipal policies, employment agreements, procedures, employee handbooks

October 2020

and/or collective bargaining agreements, any person who violates this policy or the prohibition on sexual harassment contained in 5 ILCS 430/5-65, may be subject to a fine of up to five thousand dollars (\$5,000.00) per offense, applicable disciplinary actions or discharge by the municipality and any applicable fines and penalties established pursuant to local ordinance, state law or federal law. Each violation may constitute a separate offense. Any discipline imposed by the municipality shall be separate and distinct from any penalty imposed by an ethics commission and any fines or penalties imposed by a court of law or a state or federal agency. (Ord. 734, 11-7-2018; amd. Ord. 758, 6-3-2020)

1-14-6: CONSEQUENCES FOR KNOWINGLY MAKING A FALSE REPORT:

- A. A false report is a report of sexual harassment made by an accuser to accomplish an outcome other than stopping sexual harassment or stopping retaliation for reporting sexual harassment. A false report is not a report made in good faith which cannot be proven. Given the seriousness of the consequences for the accused, a false or frivolous report is a severe offense that can itself result in disciplinary action. Any person who intentionally makes a false report alleging a violation of any provision of this policy shall be subject to disciplinary action or discharge pursuant to applicable municipal policies, employment agreements, procedures, employee handbooks and/or collective bargaining agreements.
- B. In addition, any person who intentionally makes a false report alleging a violation of any provision of the State Officials and Employees Ethics Act to an ethics commission, an inspector general, the Illinois State Police, a State's Attorney, the Attorney General or any other law enforcement official is guilty of a Class A misdemeanor. An ethics commission may levy an administrative fine of up to five thousand dollars (\$5,000.00) against any person who intentionally makes a false, frivolous or bad faith allegation. (Ord. 734, 11-7-2018; amd. Ord. 758, 6-3-2020)

7-6-3: REGULATION OF SMALL WIRELESS FACILITIES:

A. Permitted Use: Small wireless facilities shall be classified as permitted uses and subject to administrative review, except as provided in subsection C9 of this section regarding height exceptions or variances, but not subject to zoning review or approval if they are collocated: 1) in rights-of-way in any zoning district, or 2) outside rights-of-way in property zoned exclusively for commercial or industrial use.

B. Permit Required: An applicant shall obtain one or more permits from the City to collocate a small wireless facility. An application shall be received and processed, and permits issued shall be subject to the following conditions and requirements:

1. Application Requirements: A wireless provider shall provide the following information to the City, together with the City's Small Cell Facilities Permit Application, as a condition of any permit application to collocate small wireless facilities on a utility pole or wireless support structure:

a. Site specific structural integrity and, for a Municipal utility pole, make-ready analysis prepared by a structural engineer, as that term is defined in section 4 of the Structural Engineering Practice Act of 1989;

b. The location where each proposed small wireless facility or utility pole would be installed and photographs of the location and its immediate surroundings depicting the utility poles or structures on which each proposed small wireless facility would be mounted or location where utility poles or structures would be installed. This should include a depiction of the completed facility;

c. Specifications and drawings prepared by a structural engineer, as that term is defined in section 4 of the Structural Engineering Practice Act of 1989, for each proposed small wireless facility covered by the application as it is proposed to be installed;

d. The equipment type and model numbers for the antennas and all other wireless equipment associated with the small wireless facility;

e. A proposed schedule for the installation and completion of each small wireless facility covered by the application, if approved; and

f. Certification that the collocation complies with the collocation requirements and conditions contained herein, to the best of the applicant's knowledge.

g. In the event that the proposed small wireless facility is to be attached to an existing pole owned by an entity other than the City, the wireless provider shall provide legally competent evidence of the consent of the owner of such pole to the proposed collocation.

2. Application Process: The City shall process applications as follows:

a. Application Prioritization: The first completed application shall have priority over applications received by different applicants for collocation on the same utility pole or wireless support structure.

b. Existing Poles And Structures: An application to collocate a small wireless facility on an existing utility pole or wireless support structure, or replacement of an existing utility pole or wireless support structure shall be processed on a nondiscriminatory basis and shall be deemed approved if the City fails to approve or deny the application within ninety (90) days after the submission of a completed application.

However, if an applicant intends to proceed with the permitted activity on a deemed approved basis, the applicant shall notify the City in writing of its intention to invoke the deemed approved remedy no sooner than seventy five (75) days after the submission of a completed application.

The permit shall be deemed approved on the latter of the 90th day after submission of the complete application or the 10th day after the receipt of the deemed approved notice by the City. The receipt of the deemed approved notice shall not preclude the City's denial of the permit request within the time limits as provided under this chapter.

c. New Utility Pole: An application to collocate a small wireless facility that includes the installation of a new utility pole shall be processed on a nondiscriminatory basis and deemed

approved if the City fails to approve or deny the application within one hundred twenty (120) days after the submission of a completed application.

However, if an applicant intends to proceed with the permitted activity on a deemed approved basis, the applicant shall notify the City in writing of its intention to invoke the deemed approved remedy no sooner than one hundred five (105) days after the submission of a completed application.

The permit shall be deemed approved on the latter of the 120th day after submission of the complete application or the 10th day after the receipt of the deemed approved notice by the City. The receipt of the deemed approved notice shall not preclude the City's denial of the permit request within the time limits as provided under this chapter.

d. Application Denied: The City shall deny an application which does not meet the requirements of this chapter.

If the City determines that applicable codes, ordinances or regulations that concern public safety, or the collocation requirements and conditions contained herein require that the utility pole or wireless support structure be replaced before the requested collocation, approval shall be conditioned on the replacement of the utility pole or wireless support structure at the cost of the provider.

The City shall document the basis for a denial, including the specific code provisions or application conditions on which the denial is based, and send the documentation to the applicant on or before the day the City denies an application.

The applicant may cure the deficiencies identified by the City and resubmit the revised application once within thirty (30) days after notice of denial is sent to the applicant without paying an additional application fee. The City shall approve or deny the revised application within thirty (30) days after the applicant resubmits the application or it is deemed approved. Failure to resubmit the revised application within thirty (30) days of denial shall require the application to submit a new application with applicable fees, and recommencement of the City's review period.

The applicant must notify the City in writing of its intention to proceed with the permitted activity on a deemed approved basis, which may be submitted with the revised application.

Any review of a revised application shall be limited to the deficiencies cited in the denial. However, this revised application does not apply if the cure requires the review of a new location, new or different structure to be collocated upon, new antennas, or other wireless equipment associated with the small wireless facility.

e. Pole Attachment Agreement: Within thirty (30) days after an approved permit to collocate a small wireless facility on a Municipal utility pole, the City and the applicant shall enter into a Master Pole Attachment Agreement, provided by the City for the initial collocation on a Municipal utility pole by the application. For subsequent approved permits to collocate on a small wireless facility on a Municipal utility pole, the City and the applicant shall enter into a License Supplement of the Master Pole Attachment Agreement.

3. Completeness Of Application: Within thirty (30) days after receiving an application, the City shall determine whether the application is complete and notify the applicant. If an application is incomplete, the City must specifically identify the missing information. An application shall be deemed complete if the City fails to provide notification to the applicant within thirty (30) days after all documents, information and fees specifically enumerated in the City's permit application form are submitted by the applicant to the City.

Processing deadlines are tolled from the time the City sends the notice of incompleteness to the time the applicant provides the missing information.

4. Tolling: The time period for applications may be further tolled by:

- a. An express written agreement by both the applicant and the City; or
- b. A local, State or Federal disaster declaration or similar emergency that causes the delay.

5. Consolidated Applications: An applicant seeking to collocate small wireless facilities within the jurisdiction of the City shall be allowed, at the applicant's discretion, to file a consolidated application and receive a single permit for the collocation of up to twenty five (25) small wireless facilities if the collocations each involve substantially the same type of small wireless facility and substantially the same type of structure.

If an application includes multiple small wireless facilities, the City may remove small wireless facility collocations from the application and treat separately small wireless facility collocations for which incomplete information has been provided or that do not qualify for consolidated treatment or that are denied. The City may issue separate permits for each collocation that is approved in a consolidated application.

6. Duration Of Permits: The duration of a permit shall be for a period of not less than five (5) years, and the permit shall be renewed for equivalent durations unless the City makes a finding that the small wireless facilities or the new or modified utility pole do not comply with the applicable City codes or any

provision, condition or requirement contained in this chapter.

If the Act is repealed as provided in section 90 therein, renewals of permits shall be subject to the applicable City code provisions or regulations in effect at the time of renewal.

7. Means Of Submitting Applications: Applicants shall submit applications, supporting information and notices to the City by personal delivery at the City's designated place of business, by regular mail postmarked on the date due or by any other commonly used means, including electronic mail.

C. Collocation Requirements And Conditions:

1. Public Safety Space Reservation: The City may reserve space on Municipal utility poles for future public safety uses, for the City's electric utility uses, or both, but a reservation of space may not preclude the collocation of a small wireless facility unless the City reasonably determines that the Municipal utility pole cannot accommodate both uses.

2. Installation And Maintenance: The wireless provider shall install, maintain, repair and modify its small wireless facilities in safe condition and good repair and in compliance with the requirements and conditions of this chapter. The wireless provider shall ensure that its employees, agents or contractors that perform work in connection with its small wireless facilities are adequately trained and skilled in accordance with all applicable industry and governmental standards and regulations.

3. No Interference With Public Safety Communication Frequencies: The wireless provider's operation of the small wireless facilities shall not interfere with the frequencies used by a public safety agency for public safety communications.

A wireless provider shall install small wireless facilities of the type and frequency that will not cause unacceptable interference with a public safety agency's communications equipment.

Unacceptable interference will be determined by and measured in accordance with industry standards and the FCC's regulations addressing unacceptable interference to public safety spectrum or any other spectrum licensed by a public safety agency.

If a small wireless facility causes such interference, and the wireless provider has been given written notice of the interference by the public safety agency, the wireless provider, at its own expense, shall remedy the interference in a manner consistent with the abatement and resolution procedures for interference with public safety spectrum established by the FCC including 47 CFR 22.970 through 47 CFR 22.973 and 47 CFR 90.672 through 47 CFR 90.675.

The City may terminate a permit for a small wireless facility based on such interference if the wireless provider is not in compliance with the Code of Federal Regulations cited in the previous paragraph. Failure to remedy the interference as required herein shall constitute a public nuisance.

4. Collocation Restrictions: The wireless provider shall not collocate small wireless facilities on City utility poles that are part of an electric distribution or transmission system within the communication worker safety zone of the pole or the electric supply zone of the pole.

However, the antenna and support equipment of the small wireless facility may be located in the communications space on the City utility pole and on the top of the pole, if not otherwise unavailable, if the wireless provider complies with applicable codes for work involving the top of the pole.

For purposes of this subparagraph, the terms "communications space", "communication worker safety zone", and "electric supply zone" have the meanings given to those terms in the National Electric Safety Code as published by the Institute of Electrical and Electronics Engineers.

5. Code Compliance: The wireless provider shall comply with all applicable codes and local code provisions or regulations that concern public safety.

6. Design Standards: The wireless provider shall comply with written design standards that are generally applicable for decorative utility poles, or reasonable stealth, concealment and aesthetic requirements that are set forth in a City ordinance, written policy adopted by the City, a comprehensive plan or other written design plan that applies to other occupiers of the rights-of-way, including on a historic landmark or in a historic district.

7. Alternate Placements: Except as provided in this collocation requirements and conditions section, a wireless provider shall not be required to collocate small wireless facilities on any specific utility pole, or category of utility poles, or be required to collocate multiple antenna systems on a single utility pole. However, with respect to an application for the collocation of a small wireless facility associated with a new utility pole, the City may propose that the small wireless facility be collocated on an existing utility pole or existing wireless support structure within one hundred feet (100') of the proposed collocation, which the applicant shall accept if it has the right to use the alternate structure on reasonable terms and conditions, and the alternate location and structure does not impose technical limits or additional material costs as determined by the applicant.

If the applicant refuses a collocation proposed by the City,

the applicant shall provide written certification describing the property rights, technical limits or material cost reasons the alternate location does not satisfy the criteria in this paragraph.

8. Height Limitations: The maximum height of a small wireless facility shall be no more than ten feet (10') above the utility pole or wireless support structure on which the small wireless facility is collocated.

New or replacement utility poles or wireless support structures on which small wireless facilities are collocated may not exceed the higher of:

a. Ten feet (10') in height above the tallest existing utility pole, other than a utility pole supporting only wireless facilities, that is in place on the date the application is submitted to the City, that is located within three hundred feet (300') of the new or replacement utility pole or wireless support structure and that is in the same right-of-way within the jurisdictional boundary of the City, provided the City may designate which intersecting right-of-way within three hundred feet (300') of the proposed utility pole or wireless support structures shall control the height limitation for such facility; or

b. Forty five feet (45') above ground level.

9. Height Exceptions Or Variances: If an applicant proposes a height for a new or replacement pole in excess of the above height limitations on which the small wireless facility is proposed for collocation, the applicant shall apply for a special use permit or variance in conformance with procedures, terms and conditions set forth in title 10 of this Code.

10. Contractual Design Requirements: The wireless provider shall comply with requirements that are imposed by a contract between the City and a private property owner that concern design or construction standards applicable to utility poles and ground-mounted equipment located in the right-of-way.

11. Ground-Mounted Equipment Spacing: The wireless provider shall comply with applicable spacing requirements in applicable codes and ordinances concerning the location of ground-mounted equipment located in the right-of-way if the requirements include a waiver, zoning or other process that addresses wireless provider requests for exception or variance and do not prohibit granting of such exceptions or variances.

12. Undergrounding Regulations: The wireless provider shall comply with local code provisions or regulations concerning undergrounding requirements that prohibit the installation of new or the modification of existing utility poles in a right-of-way without prior approval if the requirements include a waiver, zoning or other process that addresses requests to install such new utility poles or modify such existing utility poles and do

not prohibit the replacement of utility poles.

13. Collocation Completion Deadline: Collocation for which a permit is granted shall be completed within one hundred eighty (180) days after issuance of the permit, unless the City and the wireless provider agree to extend this period or a delay is caused by make-ready work for a Municipal utility pole or by the lack of commercial power or backhaul availability at the site, provided the wireless provider has made a timely request within sixty (60) days after the issuance of the permit for commercial power or backhaul services, and the additional time to complete installation does not exceed three hundred sixty (360) days after issuance of the permit. Otherwise, the permit shall be void unless the City grants an extension in writing to the applicant.

D. Application Fees: Application fees are imposed as follows:

1. Applicant shall pay an application fee of six hundred fifty dollars (\$650.00) for an application to collocate a single small wireless facility on an existing utility pole or wireless support structure, and three hundred fifty dollars (\$350.00) for each small wireless facility addressed in a consolidated application to collocate more than one small wireless facility on existing utility poles or wireless support structures.

2. Applicant shall pay an application fee of one thousand dollars (\$1,000.00) for each small wireless facility addressed in an application that includes the installation of a new utility pole for such collocation.

3. Notwithstanding any contrary provision of State law or local ordinance, applications pursuant to this section shall be accompanied by the required application fee. Application fees shall be non-refundable.

4. The City shall not require an application, approval or permit, or require any fees or other charges, from a communications service provider authorized to occupy the rights-of-way, for:

a. Routine maintenance;

b. The replacement of wireless facilities with wireless facilities that are substantially similar, the same size, or smaller if the wireless provider notifies the City at least ten (10) days prior to the planned replacement and includes equipment specifications for the replacement of equipment consistent with subsection Bld of this section; or

c. The installation, placement, maintenance, operation or replacement of micro wireless facilities suspended on cables that are strung between existing utility poles in compliance with applicable Safety Codes.

5. Wireless providers shall secure a permit from the City to work within rights-of-way for activities that affect traffic patterns or require lane closures.

E. Exceptions To Applicability: Nothing in this chapter authorizes a person to collocate small wireless facilities on:

1. Property owned by a private party or property owned or controlled by the City or another unit of local government that is not located within rights-of-way, or a privately owned utility pole or wireless support structure without the consent of the property owner;
2. Property owned, leased, or controlled by a park district, forest preserve district, or conservation district for public park, recreation or conservation purposes without the consent of the affected district, excluding the placement of facilities on rights-of-way located in an affected district that are under the jurisdiction and control of a different unit of local government as provided by the Illinois Highway Code; or
3. Property owned by a rail carrier registered under section 18c-7201 of the Illinois Vehicle Code, Metra Commuter Rail or any other public commuter rail service, or an electric utility as defined in section 16-102 of the Public Utilities Act, without the consent of the rail carrier, public commuter rail service, or electric utility. The provisions of this chapter do not apply to an electric or gas public utility or such utility's wireless facilities if the facilities are being used, developed and maintained consistent with the provisions of subsection (i) of section 16-108.5 of the Public Utilities Act.

For the purposes of this subsection, "public utility" has the meaning given to that term in section 3-105 of the Public Utilities Act. Nothing in this chapter shall be construed to relieve any person from any requirement: a) to obtain a franchise or a State-issued authorization to offer cable service or video service or b) to obtain any required permission to install, place, maintain, or operate communications facilities, other than small wireless facilities subject to this chapter.

F. Pre-Existing Agreements: Existing agreements between the City and wireless providers that relate to the collocation of small wireless facilities in the right-of-way, including the collocation of small wireless facilities on City utility poles, that are in effect on June 1, 2018, remain in effect for all small wireless facilities collocated on the City's utility poles pursuant to applications submitted to the City before June 1, 2018, subject to applicable termination provisions contained therein. Agreements entered into after June 1, 2018, shall comply with this chapter.

A wireless provider that has an existing agreement with the City on the effective date of the Act may accept the rates, fees and terms that the City makes available under this chapter for the collocation of small wireless facilities or the installation of new utility poles for the collocation of small wireless facilities that are the subject of an application submitted two (2) or more years after the

effective date of the Act by notifying the City that it opts to accept such rates, fees and terms. The existing agreement remains in effect, subject to applicable termination provisions, for the small wireless facilities the wireless provider has collocated on the City's utility poles pursuant to applications submitted to the City before the wireless provider provides such notice and exercises its option under this paragraph.

G. Annual Recurring Rate: A wireless provider shall pay to the City an annual recurring rate to collocate a small wireless facility on a City utility pole located in a right-of-way that equals: 1) two hundred dollars (\$200.00) per year or 2) the actual, direct and reasonable costs related to the wireless provider's use of space on the City utility pole.

If the City has not billed the wireless provider actual and direct costs, the fee shall be two hundred dollars (\$200.00) payable on the first day after the first annual anniversary of the issuance of the permit or notice of intent to collocate, and on each annual anniversary date thereafter.

H. Abandonment: A small wireless facility that is not operated for a continuous period of twelve (12) months shall be considered abandoned. The owner of the facility shall remove the small wireless facility within ninety (90) days after receipt of written notice from the City notifying the wireless provider of the abandonment.

The notice shall be sent by certified or registered mail, return receipt requested, by the City to the owner at the last known address of the wireless provider. If the small wireless facility is not removed within ninety (90) days of such notice, the City may remove or cause the removal of such facility pursuant to the terms of its pole attachment agreement for Municipal utility poles or through whatever actions are provided for abatement of nuisances or by other law for removal and cost recovery.

A wireless provider shall provide written notice to the City if it sells or transfers small wireless facilities within the jurisdiction of the City. Such notice shall include the name and contact information of the new wireless provider. (Ord. 730, 8-1-2018, eff. 8-12-2018)

7-6-4: DISPUTE RESOLUTION:

The Circuit Court of Christian County shall have exclusive jurisdiction to resolve all disputes arising under the Small Wireless Facilities Deployment Act. Pending resolution of a dispute concerning rates for collocation of small wireless facilities on Municipal utility poles within the right-of-way, the City shall allow the collocating person to collocate on its poles at annual rates of no more than two hundred dollars (\$200.00) per year per Municipal utility pole, with rates to be

determined upon final resolution of the dispute. (Ord. 730, 8-1-2018, eff. 8-12-2018)

7-6-5: INDEMNIFICATION:

A wireless provider shall indemnify and hold the City harmless against any and all liability or loss from personal injury or property damage resulting from or arising out of, in whole or in part, the use or occupancy of the City improvements or right-of-way associated with such improvements by the wireless provider or its employees, agents, or contractors arising out of the rights and privileges granted under this chapter and the Act. A wireless provider has no obligation to indemnify or hold harmless against any liabilities and losses as may be due to or caused by the sole negligence of the City or its employees or agents. A wireless provider shall further waive any claims that they may have against the City with respect to consequential, incidental, or special damages, however caused, based on the theory of liability. (Ord. 730, 8-1-2018, eff. 8-12-2018)

7-6-6: INSURANCE:

The wireless provider shall carry, at the wireless provider's own cost and expense, the following insurance:

A. Property insurance for its property's replacement cost against all risks;

B. Workers' compensation insurance, as required by law; or

C. Commercial general liability insurance with respect to its activities on the City improvements or rights-of-way to afford minimum protection limits consistent with its requirements of other users of City improvements or rights-of-way, including coverage for bodily injury and property damage.

The wireless provider shall include the City as an additional insured on the commercial general liability policy and provide certification and documentation of inclusion of the City in a commercial general liability policy prior to the collocation of any wireless facility.

A wireless provider may self-insure all or a portion of the insurance coverage and limit requirement required by the City. A wireless provider that self-insures is not required, to the extent of the self-insurance, to comply with the requirement for the name of additional insureds under this section. A wireless provider that elects to self-insure shall provide to the City evidence sufficient to demonstrate its financial ability to self-insure the insurance coverage limits required by the City. to the city at the time the application is filed. (Ord. 634, 7-14-2009)

2. The owner or his agent, seeking a permit for the connection of a building sewer to a public sewer under city jurisdiction shall make application therefor to the superintendent of water/sewer on a form furnished by the city. The permit application shall be supplemented by any plans, specifications or other information considered pertinent in the judgment of the superintendent. If, in issuing a permit, the superintendent fixed special conditions thereto, the permit shall be void unless such conditions are fully observed. No permit will be issued for connection of a building sewer to a public sewer under city jurisdiction for which a tapping fee has been established until after payment of such tapping fee to the city.

3. A building sewer permit will only be issued and a sewer connection shall only be allowed if it can be demonstrated that the downstream sewerage facilities, including sewers, pump stations and wastewater treatment facilities, have sufficient reserve capacity to adequately and efficiently handle the additional anticipated waste load.

4. Except as may be otherwise directed by the city, any permit under which work has not commenced and been reasonably prosecuted to completion shall expire six (6) months from the date of issuance.

C. Cost Of Installation Of Building Sewer: All costs and expenses incident to the installation and connection of the building sewer shall be borne by the owner. The owner shall indemnify the city from any loss or damage that may directly or indirectly be occasioned by the installation of the building sewer.

D. Separate Building Sewer Provided for Every Building: A separate and independent building sewer shall be provided for every building, except that where one building stands at the rear of another on an interior lot and no private sewer is available or can be constructed to the rear building through an adjoining alley, court, yard or driveway, the building sewer from the front building may be extended to the rear building and the whole considered as one building sewer.

E. Use of Old Building Sewers: Old building sewers may be used in connection with new buildings only when they are found, on examination and test, by the Superintendent of Water/Sewer, to meet all requirements of this Chapter.

F. Methods and Materials of Construction: The size, slope, alignment, materials of construction of a building sewer, and the methods to be used in excavating, placing of the pipe, jointing, testing and backfilling the trench shall all conform to the requirements of the Building and Plumbing Code or other applicable rules and regulations of the City. In the absence

of Code provisions or in amplification thereof, the materials and procedures set forth in the Illinois State Plumbing Code, latest revision, shall apply.

G. Gravity Flow of Building Drain: Whenever possible, the building sewer shall be brought to the building at an elevation below the basement floor. In all buildings in which any building drain is too low to permit gravity flow to the public sewer, sanitary sewage carried by such building drain shall be lifted by a means which is approved by the Superintendent of Water/Sewer and discharged to the building sewer.

H. Surface Runoff or Ground Water: No person shall make connection of roof downspouts, exterior foundation drains, areaway drains or other sources of surface runoff or ground water to a building sewer or building drain which in turn is connected directly or indirectly to a public sanitary sewer.

I. Connection of Building Sewer to Public Sewer: The building sewer shall be connected to the public sewer at and by means of the "Y" branch, "T" branch, or special opening left in the public sewer for the specific purpose of making such connection. At locations where a branch or special opening has not been provided in the public sewer, the connection shall be made using an appropriate tapping saddle or other special fitting utilizing procedures and materials approved by the Superintendent of Water/Sewer, to provide a structurally sound, watertight and gastight connection.

J. Inspection of Connection to Public Sewer:

1. All building sewers, the connection thereof to the City sewer system, and such portions of existing building systems as may be affected by new work or any changes, shall be inspected by the Superintendent of Water/Sewer to insure compliance with all the requirements of this Chapter and to assure that the installation and construction of the building sewer and connections thereto is in accordance with approved plans and conditions of this Chapter.

2. It shall be the duty of the holder of a permit (or his agent) to give notice to the Superintendent when the building sewer is ready for test or inspection. No part of the building sewer shall be covered until it has been inspected, tested and accepted by the Superintendent. Conditions of the inspecting and testing shall be by water testing as provided in the State Plumbing Code or other methods approved by the Superintendent.

K. Barricades and Lights Around Sewer Excavation: All excavations for building sewer installation shall be adequately guarded with barricades and lights so as to protect the public from hazard. Streets, sidewalks, parkways and other public property disturbed in the course of the work shall be restored in a manner satisfactory to the City. (Ord. 444, 7-5-90)

8-3-5: USE OF THE PUBLIC SEWERS:

A. Discharge of Storm Water and Other Unpolluted Drainage:

1. No person shall discharge, or cause to be discharged, any storm water, surface water, ground water, roof runoff, subsurface drainage, uncontaminated cooling water or unpolluted industrial process waters to any sanitary sewer.
2. Storm water and all other unpolluted drainage shall be discharged to such sewers as are specifically designated as storm sewers, or to a natural outlet approved by the Superintendent of Water/Sewer. Industrial cooling water or unpolluted process waters may be discharged on approval of the Superintendent to a storm sewer or natural outlet.

1. Any gasoline, benzene, naphtha, fuel oil or other flammable or explosive liquid, solid or gas.
2. Any waters or wastes containing toxic or poisonous solids, liquids or gases in sufficient quantity, either singly or by interaction with other wastes, to injure or interfere with any sewage treatment process, constitute a hazard to humans or animals, create a public nuisance or create any hazard in the receiving waters of the sewage treatment plant.
3. Any waters or wastes having a pH lower than 5.5 or having any other corrosive property capable of causing damage or hazard to structures, equipment, and personnel of the sewage works.
4. Solid or viscous substances in quantities or of such size capable of causing obstruction to the flow in sewers, or other interference with the proper operation of the sewage works such as, but not limited to, ashes, cinders, sand, mud, straw, shavings, metal, glass, rags, feathers, tar, plastics, wood, unground garbage, whole blood, paunch manure, hair and fleshings, entrails and paper dishes, cups, milk containers, etc., either whole or ground by garbage grinders.

C. Discharges Restricted into Public Sewers: No person shall discharge or cause to be discharged the following described substances, materials, waters or wastes if it appears likely in the opinion of the Superintendent of Water/Sewer that such wastes can harm either the sewers, sewage treatment process or equipment; have an adverse effect on the receiving stream; or can otherwise endanger life, limb, public property or constitute a nuisance. In forming his opinion as to the acceptability of these wastes, the Superintendent will give consideration to such factors as the quantities of subject wastes in relation to flows and velocities in the sewers,

materials of construction of the sewers, nature of the sewage treatment process, capacity of the sewage treatment plant, degree of treatability of wastes in the sewage treatment plant, and maximum limits established by regulatory agencies. The substances prohibited are:

1. Any liquid or vapor having a temperature higher than one hundred fifty degrees (150°) Fahrenheit, (65°C).
2. Any waters or wastes containing toxic or poisonous materials; or oils, whether emulsified or not, in excess of one hundred (100) mg/l or containing substances which may solidify or become viscous at temperatures between thirty two (32°) and one hundred fifty degrees (150°) Fahrenheit.

4. Any waters or wastes containing strong acid, iron pickling wastes, or concentrated plating solutions whether neutralized or not.
5. Any waters or wastes containing iron, chromium, copper, zinc or similar objectionable or toxic substances; or wastes exerting an excessive chlorine requirement, to such degree that any such material received in the composite sewage at the sewage treatment works exceeds the limits established by the Superintendent of Water/Sewer for such materials.
6. Any waters or wastes containing phenols or other taste or odor-producing substances, in such concentrations exceeding limits which may be established by the composite sewage, to meet the requirements of the State, Federal, or other public agencies of jurisdiction for such discharge to the receiving waters.
7. Any radioactive wastes or isotopes of such half-life or concentration as may exceed limits established by the Superintendent of Water/Sewer in compliance with applicable State or Federal regulations.
8. Any waters or wastes having a pH in excess of 9.5.
9. Any mercury or any of its compounds in excess of 0.0005 mg/l as Hg at any time except as permitted by the Superintendent of Water/Sewer in compliance with applicable State and Federal regulations.
10. Any cyanide in excess of 0.025 mg/l at any time except as permitted by the Superintendent of Water/Sewer in compliance with applicable State and Federal regulations.
11. Materials which exert or cause:

- a. Unusual concentrations of inert suspended solids (such as, but not limited to, fuller's earth, lime slurries and lime residues) or of dissolved solids (such as, but not limited to, sodium chloride and sodium sulfate);
- b. Excessive discoloration (such as, but not limited to, dye wastes and vegetable tanning solutions);
- c. Unusual BOD, biochemical oxygen demand, or chlorine requirements in such quantities as to constitute a significant load on the sewage treatment works;
- d. Unusual volume of flow or concentrations of wastes constituting "slugs" as defined herein.

12. Waters or wastes containing substances which are not amenable to treatment or reduction by the sewage treatment processes employed, or are amenable to treatment only to such degree that the sewage treatment plant effluent cannot meet the requirements of agencies having jurisdiction over discharge to the receiving waters.

D. Options for Waste Discharge:

1. If any waters or wastes are discharged, or are proposed to be discharged to the public sewers, which waters contain the substances or possess the characteristics enumerated in subsection C of this Section, and/or which are in violation of the standards for pretreatment provided in 35 Illinois Administrative Code, subtitle C - Water Pollution Control, chapter 1 - Pollution Control Board, Part 307 - Sewer Discharge Criteria and any amendments thereto, and which in the judgment of the Superintendent of Water/Sewer may have a deleterious effect upon the sewage works, processes, equipment, or receiving waters, or which otherwise create a hazard to life or constitute a public nuisance, the Superintendent may:

- a. Reject the wastes;
- b. Require pretreatment to an acceptable condition for discharge to the public sewers;
- c. Require control over the quantities and rates of discharge; and/or
- d. Require payment to cover the added costs of handling and treating the wastes not covered by existing taxes or sewer charges, under the provisions of subsection J of this Section.

2. If the Superintendent of Water/Sewer permits the pretreatment or equalization of waste flows, the design and installation of the plants and equipment shall be subject to the review and approval of the Superintendent, and subject to the requirements of all applicable codes, ordinances and laws.

E. Grease, Oil and Sand Interceptors: Grease, oil and sand interceptors shall be provided when, in the opinion of the Superintendent of Water/Sewer they are necessary for the proper handling of liquid wastes containing grease in excessive amounts, or any flammable wastes, sand or other harmful ingredients; except that such interceptors shall not be required for private living quarters or dwelling units. All interceptors shall be of a type and capacity approved by the Superintendent and shall be located as to be readily and easily accessible for cleaning and inspection.

F. Preliminary Treatment Facilities: Where preliminary treatment or flow-equalizing facilities are provided, they shall be maintained continuously in satisfactory and effective operation by the owner at his expense.

G. Industrial User Discharge Permit: Each industrial user of a sewer shall not discharge materials to a sewer without having first applied for and obtained a discharge permit from the Superintendent of Water/Sewer. Each such user presently discharging material to a sewer shall apply for and obtain such a discharge permit within ninety (90) days from the effective date of this Chapter.

H. Control Manhole:

1. When required by the City, the owner of any property serviced by a building sewer carrying industrial wastes shall install a suitable control manhole together with such necessary meters and other appurtenances in the building sewer to facilitate observation, sampling and measurement of the wastes. Such control manhole, when required, shall be accessibly and safely located, and shall be constructed in accordance with plans approved by the Superintendent of Water/Sewer. The control manhole shall be installed by the owner at his expense, and shall be maintained by him so as to be safe and accessible at all times.

2. All measurements, tests and analyses of the characteristics of waters and wastes to which reference is made in this Chapter shall be determined in accordance with the latest edition of "Standard Methods for the Examination of Water and Wastewater", published by the American Public Health Association, and shall be determined at the control manhole provided, or upon suitable samples taken at the control manhole.

3. In the event that no special manhole has been required, the control manhole shall be considered to be the nearest downstream manhole in the public sewer to the point at which the building sewer is connected. Sampling shall be carried out by customarily accepted methods to reflect the effect of constituents upon the sewer system and upon the sewage works and to determine the existence of hazards to life, limb, and property.

I. Industrial Waste Testing:

1. The owner of any property serviced by a building sewer carrying industrial wastes shall provide laboratory measurements, tests and analyses of waters and wastes to illustrate compliance with this Chapter and any special conditions for discharge established by the City or regulatory agencies having jurisdiction over the discharge.

2. The number, type and frequency of laboratory analyses to be performed by the owner shall be as stipulated by the City, but no less than once per year the industry must supply a complete analysis of the constituents of the wastewater discharge to assure that compliance with the Federal, State and local standards are being met. The owner shall report the results of measurements and laboratory analyses to the City at such times and in such manner as prescribed by the City. The owner shall bear the expense of all measurements, analyses and reporting required by the City. At such times as deemed necessary, the City reserves the right to take measurements and samples for analysis by an outside laboratory service.

J. Special Agreements: No statement contained in this Section shall be construed as preventing any special agreement or arrangement between the City and any industrial concern whereby an industrial waste of unusual strength or character may be accepted by the City for treatment, subject to payment therefor, in accordance with Section 8-4-1 of this Title, by the industrial concern, provided such payments are in accordance with Federal and State Guidelines for User Charge Systems. (Ord. 444, 7-5-90)

8-3-6: PROTECTION OF SEWAGE WORKS FROM DAMAGE:

No unauthorized person shall maliciously, wilfully or negligently break, damage, destroy or tamper with any structure, appurtenance or equipment which is a part of the sewage works. Any person violating this provision shall be subject to immediate arrest under charge of disorderly conduct. (Ord. 444, 7-5-90)

8-3-7: POWERS AND AUTHORITY OF INSPECTORS:

A. Right of Entry: The Superintendent of Water/Sewer and other duly authorized employees of the City, the Illinois Environmental Protection Agency, and the U.S. Environmental Protection Agency, bearing proper credentials and identification, shall be permitted to enter all properties for the purposes of inspection, observation, measurement, sampling and testing in accordance with the provisions of this Chapter. The Superintendent of Water/Sewer or his representative shall have no authority to inquire into any processes, including metallurgical, chemical, oil refining, ceramic, paper or other industries beyond that point having a direct bearing on the

kind and source of discharge to the sewers or waterway or facilities for waste treatment.

B. Indemnification: While performing the necessary work on private properties referred to in subsection A above, the Superintendent of Water/Sewer or duly authorized employees of the City, the Illinois Environmental Protection Agency, and the U.S. Environmental Protection Agency shall observe all safety rules applicable to the premises established by the company and the company shall be held harmless for injury or death to the City employees, and the City shall indemnify the company against loss or damage to its property by City employees and against liability claims and demands for personal injury or property damage asserted against the company and growing out of the gauging and sampling operation, except as such may be caused by negligence or failure of the company to maintain safe conditions as required in subsection 8-3-5H of this Chapter.

C. Easements on Private Property: The Superintendent of Water/Sewer and other duly authorized employees of the City bearing proper credentials and identification shall be permitted to enter all private properties through which the City holds a duly negotiated easement for the purposes of, but not limited to, inspection, observation, measurement, sampling, repair and maintenance of any portion of the sewage works lying within said easement. All entry and subsequent work, if any, on said easement, shall be done in full accordance with the terms of the duly negotiated easement pertaining to the private property involved. (Ord. 444, 7-5-90)

8-3-8: VIOLATION; PENALTIES:

A. Penalty: Any person found to be violating any provision of this Chapter, except Section 8-3-6, shall be served by the City with written notice stating the nature of the violation and providing a reasonable time limit for the satisfactory correction thereof. The offender shall, within the period of time stated in such notice, permanently cease all violations. The city may revoke any permit for sewage disposal as a result of any violation of any provision of this chapter.

B. Continued Violation: Any person who shall continue any violation beyond the time limit provided for in subsection A of this section, shall be guilty of a misdemeanor, and on conviction thereof shall be fined in the amount not exceeding one hundred dollars (\$100.00) for each violation. Each day in which any such violation shall continue shall be deemed a separate offense.

C. Violating Provision: Any person violating any of the provisions of this chapter shall become liable to the city by reason of such violation. (Ord. 444, 7-5-1990)

8-3-9: COMPLIANCE WITH NPDES PERMIT PROGRAM:

A. Introduction: It is hereby prohibited for any person or entity to introduce any new inflow source to the sewer system of the city of Assumption.

B. New Construction:

1. Before a permit will be issued, any new construction to introduce a new inflow source, making connection with, or opening to, use, alter or disturb any public sewer or appurtenance must be designed to minimize and/or delay inflow contribution to the combined sewer system;

2. Any new construction must be installed, completed and maintained based upon the initial design to minimize and/or delay inflow into the combined sewer system.

C. Storm Sewer System:

1. At the time of the completion of a separate storm sewer system, all inflow sources on the combined sewer system must be disconnected and connected to the proper storm sewer or sanitary sewer system.

2. All owners, persons or entities responsible for inflow sources must disconnect and connect to the storm sewer system within one hundred eighty (180) days of the separate storm sewer system becoming available.

D. New Connections: Any new building domestic waste connection to the combined sewer system must be separate and distinct from the building inflow connection in order to facilitate disconnection, if a storm sewer system becomes available.

E. Combined Sewer Overflow (CSO) Impacts:

1. The superintendent of water/sewer shall compile and maintain a list of nondomestic sources tributary to the combined sewer system. In the event that pollutants from nondomestic discharges are found to contribute to water quality violations in the CSO's receiving water, or to negatively impact the collection system or treatment processes, or to violate any other portion of this chapter, the city of Assumption shall review the available information regarding such discharges and, if appropriate and feasible, shall modify this section to control the discharge of said pollutants.

2. All owners of any combined sewers tributary to the city of Assumption's collection system shall have procedures in place to ensure that the objectives, mechanisms, and specific procedures for operation and maintenance as described in the NPDES permit are achieved and maintained. SECTION:

- 8-4-1: Rates And Charges Established
- 8-4-2: Billing Procedure; Delinquencies
- 8-4-3: Lien For Nonpayment
- 8-4-4: Disposition Of Revenues
- 8-4-5: System Of Accounts
- 8-4-6: Notice Of Rates
- 8-4-7: Appeals
- 8-4-8: Access To Records
- 8-4-9: Penalty !2R!

8-4-1: RATES AND CHARGES ESTABLISHED:

- A. Authority: Pursuant to section 1046 of the Illinois Environmental Protection Act there is hereby imposed and levied upon all users of the City sewerage system such charges as are hereinafter fixed to pay for the operation, maintenance, replacement, treatment and capital recovery costs of the City sewerage system.
- B. Base User Rate:
 - 1. The wastewater service charge for the use of and for service supplied by the wastewater facilities of the City shall consist of a base user charge for operation and maintenance, replacement, and bond retirement. All users shall pay this charge.
 - 2. The base user charge shall be based on water usage as recorded by water meters for wastes having the following normal conditions:
 - a. A five (5) day, twenty degree (20°) centigrade biochemical oxygen demand (BOD₅) of two hundred (200) mg/l.
 - b. A suspended solids (SS) content of two hundred sixty (260) mg/l.
 - 3. The base user charge is computed from the following:
 - a. Estimate the projected annual revenue required to operate and maintain the wastewater facilities, including a replacement fund for the year, for all works categories.
 - b. Estimate the annual revenue required for debt service charges (principal and interest) on the outstanding bonds used for financing sewerage system improvements.

- c. Estimate the total number of sanitary sewer connections.
 - d. Proportion the estimated costs to wastewater facility categories by volume, suspended solids and BOD, if possible.
 - e. Estimate wastewater volume, pounds of SS and pounds of BOD to be treated.
 - f. Proportion the estimated costs to nonindustrial and industrial users by volume, suspended solids and BOD.
 - g. Compute costs per one thousand (1,000) gallons for normal sewage strength.
 - h. Compute surcharge costs per pound of BOD and SS in excess of normal sewage strength.
4. The City shall periodically sample and analyze wastes from selected users in each industrial and commercial user classification to determine the BOD and SS strength of the wastes and these results shall be used as representative of wastes from all users in that classification for billing purposes unless the user's waste is classified by the Superintendent of Water/Sewer as having special problems. At request of user, samples shall be made and analyzed on the same frequency as samples for user's classification, and that analysis shall be used as typical of that particular user's waste for billing purposes. Industries with wastes classified by the Superintendent of Water/Sewer as having special problems shall, if directed by the City, install at the industry's own cost sampling devices as required by the Superintendent of Water/Sewer in a structure located on the building service line, to obtain exact information about the waste.

C. Additional Charges:

1. A surcharge will be levied to all users whose waters exceed normal concentrations for BOD (200 mg/L) and SS (260 mg/L). The surcharge will be based on water usage as recorded by water meters for all wastes which exceed the two hundred milligrams per liter (200 mg/L) and two hundred sixty milligrams per liter (260 mg/L) concentration for BOD and SS respectively. Subsection I of this section specifies the procedure to compute a surcharge.

2. There shall be billed, as required, additional charges for the following:

- a. Actual costs incurred for user requested sampling and analyses.
- b. Actual costs incurred for special handling not provided for elsewhere in this chapter.
- c. Actual costs incurred for handling a user's check with nonsufficient funds.

D. Annual Review Of Rates: The adequacy of the wastewater service charge shall be reviewed annually by certified public accountants for the City in their annual audit report. The wastewater service charge shall be revised periodically to reflect a change in debt service or a change in operation and maintenance costs including replacement costs.

E. Measurement Of Flow: The volume of flow used for computing basic user charges and surcharges shall be metered City water consumption read to the lowest even increments of one thousand (1,000) gallons.

1. If the person discharging wastes into the public sewers procures any part, or all, of his water from sources other than the public waterworks system, all or a part of which is discharged into the public sewers, the person shall install and maintain, at his expense, water meters of a type approved by the Superintendent of Water/Sewer for the purpose of determining the volume of water obtained from these other sources.

2. Devices for measuring the volume of waste discharged may be required by the Superintendent of Water/Sewer if these volumes cannot otherwise be determined from the metered water consumption records.

3. Metering devices for determining the volume of waste shall be installed, owned and maintained by the person. Following approval and installation such meters may not be removed, unless service is canceled, without the consent of the Superintendent of Water/Sewer.

November 2021

4. All users not having a water meter or other acceptable device for determining billable flow shall be subject to a fixed sewer bill, which shall consist of a fixed user charge plus a fixed capital cost recovery charge in an amount determined by the City to be equal to those charges imposed on users having similar water use and wastewater characteristics. However, the minimum sewer bill shall be fifteen dollars (\$15.00) per two (2) month billing period.
5. All customers outside corporate limits must have corporate water service in order to receive corporate sewer service.
- F. Debt Service Charge: A debt service charge (CD) of zero dollars (\$0.00) per one thousand (1,000) gallons to each user of the wastewater facility of the City is hereby established.
- G. Base User Rate:
 1. Inside Corporate Limits:

 - b. Minimum Base User Charge (CM): A minimum base user charge (CM) for the first two thousand five hundred (2,500) gallons (or any part thereof) per two (2) month billing period shall be twenty five dollars and thirty eight cents (\$25.38), effective January 2022.
 - c. Base User Rate (CU) For Operation, Maintenance And Replacement: The rate shall be calculated at seven dollars and eighty eight cents (\$7.88) per one thousand (1,000) gallons of usage over two thousand five hundred (2,500) gallons up to ten thousand (10,000) gallons per two (2) month billing period, per metered usage, effective January 2022. The rate shall be calculated at eight dollars and fifty four cents (\$8.54) per one thousand (1,000) gallons of usage over ten thousand (10,000) gallons per two (2) month billing period, per metered usage, effective January 2022. 1. Said rates and charges for sewer service shall be billed and payable every two (2) months. The billing of the sewer service shall commence upon connection of the user to the sewer. (Ord. 497, 7-5-1995)
2. The owner of the premises, the occupant thereof and the user of the service shall be jointly and severally liable to pay for the service to such premises and the service is furnished to the premises by the City only upon the condition that the owner of the premises, occupant and user of the services are jointly and severally liable therefor to the City. (Ord. 444, 7-5-1990)
3. Charges for sewer service shall be billed every two (2) months and shall be payable on or before the tenth day of the billing month. There shall be a ten dollar (\$10.00) late charge added to the billing if payment is not received by the tenth day of the billing month. In addition, if the payments are not received when due, water service shall be shut off on the tenth day of the month. Such service shall not be resumed until all payments then due and payable shall be paid. If any check given in payment for sewer service is returned for insufficient funds or is otherwise not accepted as valid, there shall be a twenty five dollar (\$25.00) service charge added to the billing which amount shall be in excess of any other penalty or consequence resulting from failure to pay in proper and timely fashion. After a person has written the City of Assumption three (3) NSF checks, the City will require the customer to pay any future bills in cash or any guaranteed check (cashier's check, money order). Also refer to section 1-13-1, "Schedule Of Penalties And Rates", of this Code. (Ord. 659, 8-1-2012)

4. The payments may be made by the customer to the City Water Collector in person at the office of the City Water Collector, or can be paid by a check payable to the City enclosed in an envelope with postage prepaid, properly addressed to the City Water Collector of the City and deposited in the United States mail. The payments, if made by mail, should clearly designate the name of the customer and the account number of the statement received by the customer on said bill. (Ord. 444, 7-5-1990; amd. Ord. 497, 7-5-1995)

8-4-3: LIEN FOR NONPAYMENT:

A. Lien; Notice Of Delinquency:

1. Whenever a bill for sewer service remains unpaid for thirty (30) days after it has been rendered, the City Water Collector shall have the City Clerk file with the County Recorder of Deeds a statement of lien claim. This statement shall contain the legal description of the premises served, the amount of the unpaid bill, and a notice that the City claims a lien for this amount, as well as for all charges subsequent to the period covered by the bill.

2. If the user whose bill is unpaid is not the owner of the premises and the Water Collector has notice of this, notice shall be mailed to the owner of the premises if his address be known to the Water Collector, whenever such bill remains unpaid for the period of thirty (30) days. (Ord. 527, 10-7-1998)

3. The failure of the City Treasurer to record such lien or to mail such notice or the failure of the owner to receive such notice shall not affect the right to foreclose the lien for unpaid bills as provided in the foregoing Section.

B. Foreclosure Of Lien: Property subject to a lien for unpaid charges shall be sold for nonpayment of the same, and the proceeds of the sale shall be applied to pay the charges, after deducting costs, as is the case in the foreclosure of statutory liens. Such foreclosure shall be by bill-in-equity in the name of the City. The City Attorney is hereby authorized and directed to institute such proceedings in the name of the City in any court having jurisdiction over such matters against any property for which the bill has remained unpaid ninety (90) days after it has been rendered. (Ord. 444, 7-5-1990)

8-4-4: DISPOSITION OF REVENUES:

(Ord. 497, 7-5-1995)
- B. In addition to the customary operating statements, the annual audit report shall also reflect the revenues and operating expenses of the wastewater facilities, including a replacement cost, to indicate that sewer service charges under the waste cost recover system do in fact meet these regulations. In this regard, the financial information to be shown in the audit report shall include the following:

8-5-1: PURPOSE:

A. Authority: Rule 890.1510 of the Illinois Plumbing Code, 77 Illinois Administrative Code 890.1510, requires protection of all potable water systems from contamination due to backflow of contaminants through plumbing connections, fixtures or appurtenances. The Illinois Pollution Control Board Regulations, 35 Illinois Administrative Code 601.101 et seq. requires an active program of cross-connection control which will prevent the contamination of all public water supply systems due to backflow of contaminants or pollutants through the potable water service connection. In order to accomplish these goals it is necessary to introduce restrictions that describe in detail specific procedures and requirements for cross-connection control.

B. Purpose: The purpose of these rules and regulations is:

1. To protect the public water supply system from contamination or pollution by isolating within the customer's water system contaminants or pollutants which could backflow through the service connection into the public water supply system.
2. To promote the elimination or control of existing cross-connections, actual or potential, between the public or consumer's potable water system and nonpotable water system, plumbing fixtures and sources or systems containing substances of unknown or questionable safety.
3. To provide for the maintenance of a continuing program of cross-connection control which will prevent the contamination or pollution of the public and consumer's potable water system.

C. Application: These rules and regulations shall apply to all

premises served by the public potable water supply system of the City. (Ord. 520, 8-6-1997)

8-5-2: DEFINITIONS:

The following definitions shall apply in the interpretation and enforcement of these regulations:

!DEF! AGENCY: Illinois Environmental Protection Agency.

APPROVED: Backflow prevention devices or methods approved by the Research Foundation for Cross-Connection Control of the University of Southern California, Association of State Sanitary Engineers, American Water Works Association, American National Standards Institute or certified by the National Sanitation Foundation.

AUXILIARY WATER SYSTEM: Any water source or system on or available to the premises other than the public water supply system and includes the water supplied by the system. These auxiliary waters may include water from another purveyor's public water supply system; or water from a source such as wells, lakes, or streams; or process fluids; or used water. These waters may be polluted or contaminated or objectionable or constitute a water source or system over which the water purveyor does not have control.

BACKFLOW: The flow of water or other liquids, mixtures, or substances into the distribution pipes of a potable water system from any source other than the intended source of the potable water supply.

BACKFLOW PREVENTION DEVICE: Any device, method, or type of construction intended to prevent backflow into a potable water system. All devices used for backflow prevention in Illinois must meet the standards of the Illinois Plumbing Code and the Illinois Environmental Protection Agency.

CONSUMER OR CUSTOMER: The owner, official custodian or person in control of any premises supplied by or in any manner connected to a public water system.

CONSUMER'S WATER SYSTEM: Any water system located on the customer's premises. A building plumbing system is considered to be a customer's water system.

CONTAMINATION: An impairment of the quality of the water by entrance of any substance to a degree which could create a health hazard.

CROSS-CONNECTION: Any physical connection or arrangement between two (2) otherwise separate piping systems, one of which contains potable water and the other a substance of unknown or questionable safety or quality, whereby there may be a flow from one system into the other.

CROSS-CONNECTION, DIRECT: A cross-connection formed when a water system is physically joined to a source of unknown or unsafe substance.

CROSS-CONNECTION, INDIRECT: A cross-connection through which an unknown substance can be forced, drawn by vacuum or otherwise introduced into a safe potable water system.

CROSS-CONNECTION, POTENTIAL: A fixture or appurtenance with threaded hose connection, tapered spout, or other connection which would facilitate extension of the water supply line beyond its legal termination point.

DOUBLE CHECK VALVE ASSEMBLY: An assembly composed of single, independently acting check valves approved under ASSE Standards 1015. A "double check valve assembly" must include tight shut-off valves located at each end of the assembly and suitable connections for testing the watertightness of each check valve.

FIXED PROPER AIR GAP: The unobstructed vertical distance through the free atmosphere between the water discharge point and the flood level rim of the receptacle.

HEALTH HAZARD: Any condition, device or practice in a water system or its operation resulting from a real or potential danger to the health and well-being of consumers. The word "severe" as used to qualify "health hazard" means a hazard to the health of the user that could be expected to result in death or significant reduction in the quality of life.

INSPECTION: A plumbing inspection to examine carefully and critically all materials, fixtures, piping and appurtenances, appliances and installations of a plumbing system for compliance with requirements of the Illinois Plumbing Code, 77 Illinois Administrative Code 890.

PLUMBING: The actual installation, repair, maintenance, alteration or extension of a plumbing system by any person. Plumbing includes all piping, fixtures, appurtenances and appliances for a supply of water for all purposes, including, without limitation, lawn sprinkler systems, from the source of a private water supply on the premises or from the main in the street, alley or at the curb to, within and about any building or buildings where a person or persons live, work or assemble. Plumbing includes all piping, from discharge of pumping units to and including pressure tanks in water supply systems. Plumbing includes all piping, fixtures, appurtenances, and appliances from a building drain and a sanitary drainage and related ventilation system of any building or buildings where a person or persons live, work or assemble from the point of connection of such building drain to the building sewer or private sewage disposal system five feet (5') beyond the foundation walls.

POLLUTION: The presence of any foreign substance (organic,

inorganic, radiological, or biological) in water that tends to degrade its quality so as to constitute a hazard or impair the usefulness of the water.

PROCESS FLUID(S): Any fluid or solution which may be chemically, biologically or otherwise contaminated or polluted in a form or concentration such as would constitute a health, pollutional, or system hazard if introduced into the public or a consumer's potable water system. This includes, but is not limited to:

- A. Polluted or contaminated waters;
- B. Process waters;
- C. Used waters originating from the public water supply system which may have deteriorated in sanitary quality;
- D. Cooling waters;
- E. Questionable or contaminated natural waters taken from wells, lakes, streams, or irrigation systems;
- F. Chemicals in solution or suspension;
- G. Oils, gases, acids, alkalis and other liquid and gaseous fluids used in industrial or other processes, or for firefighting purposes.

PUBLIC WATER SUPPLY: All mains, pipes and structures through which water is obtained and distributed to the public, including wells and well structures, intakes and cribs, pumping stations, treatment plants, reservoirs, storage tanks and appurtenances, collectively or severally, actually used or intended for use for the purpose of furnishing water for drinking or general domestic use and which serve at least fifteen (15) service connections or which regularly serve at least twenty five (25) persons at least sixty (60) days per year. A public water supply is either a "community water supply" or a "noncommunity water supply".

REDUCED PRESSURE PRINCIPLE BACKFLOW PREVENTION DEVICE: A device containing a minimum of two (2) independently acting check valves together with an automatically operated pressure differential relief valve located between the two (2) check valves and approved under ASSE Standard 1013. During normal flow and at the cessation of normal flow, the pressure between these two (2) checks shall be less than the supply pressure. In case of leakage of either check valve, the differential relief valve, by discharging to the atmosphere, shall operate to maintain the pressure between the check valves at less than the supply pressure. The unit must include tightly closing shut-off valves located at each end of the device, and each device shall be fitted with properly located test cocks.

SERVICE CONNECTION: The opening, including all fittings and appurtenances, at the water main through which water is supplied to the user.

SURVEY: The collection of information pertaining to a customer's piping system regarding the location of all connections to the public water supply system and must include the location, type and most recent inspection and testing date of all cross-connection control devices and methods located within that customer's piping system. The survey must be in written form, and should not be an actual plumbing inspection.

SYSTEM HAZARD: A condition through which an aesthetically objectionable or degrading material not dangerous to health may enter the public water supply system or a consumer's potable water system.

WATER, NONPOTABLE: Water not safe for drinking, personal, or culinary use as determined by the requirements of 35 Illinois Administrative Code 604.

WATER, POTABLE: Water which meets the requirements of 35 Illinois Administrative Code 604 for drinking, culinary, and domestic purposes.

WATER PURVEYOR: The owner or official custodian of a public water system.

WATER, USED: Any water supplied by a public water system to a consumer's water system after it has passed through the service connection and is no longer under the control of the water supply official custodian. (Ord. 520, 8-6-1997) !DEFEND!

8-5-3: WATER SYSTEM:

A. The water system shall be considered as made up of two (2) parts: the public water supply system and the consumer's water system.

B. The public water supply system shall consist of the source facilities and the distribution system, and shall include all those facilities of the potable water system under the control of the Superintendent of Water/Sewer up to the point where the consumer's water system begins.

C. The source shall include all components of the facilities utilized in the production, treatment, storage, and delivery of water to the public water supply distribution system.

D. The public water supply distribution system shall include the network of conduits used to deliver water from the source to the consumer's water system.

E. The consumer's water system shall include all parts of the facilities beyond the service connection used to convey water

from the public water supply distribution system to points of use. (Ord. 520, 8-6-1997)

8-5-4: CROSS-CONNECTION PROHIBITED:

A. Connections between potable water systems and other systems or equipment containing water or other substances of unknown or questionable quality are prohibited except when and where approved cross-connection control devices or methods are installed, tested and maintained to ensure proper operation on a continuing basis.

B. 1. No physical connection shall be permitted between the potable portion of a supply and any other water supply not of equal or better bacteriological and chemical quality as determined by inspection and analysis by the Agency.

2. There shall be no arrangement or connection by which an unsafe substance may enter a supply.

C. No person, firm or corporation shall establish or permit to be established or maintain or permit to be maintained any connection whereby a private, auxiliary or emergency water supply other than the regular public water supply of the City may enter the supply or distribution system of said Municipality, unless such private, auxiliary or emergency water supply and the method of connection and use of such supply shall have been approved by the Superintendent of Water/Sewer and the Illinois Environmental Protection Agency. (Ord. 520, 8-6-1997)

8-5-5: SURVEYS AND INVESTIGATIONS:

A. It shall be the duty of the Superintendent of Water/Sewer to cause surveys and investigations to be made of commercial, industrial and other properties served by the public water supply to determine whether actual or potential hazards to the public water supply may exist. Such surveys and investigations shall be made a matter of public record and shall be repeated at least every two (2) years, or as often as the Superintendent of Water/Sewer shall deem necessary. Records of such surveys shall be maintained and available for review for a period of at least five (5) years.

B. The consumer's premises shall be open at all reasonable times to the approved Cross-Connection Control Device Inspector for the inspection of the presence or absence of cross-connections within the consumer's premises, and testing, repair and maintenance of cross-connection control devices within the consumer's premises.

C. On request by the Superintendent of Water/Sewer, or his authorized representative, the consumer shall furnish information regarding the piping system or systems or water

use within the customer's premises. The consumer's premises shall be open at all reasonable times to the Superintendent of Water/Sewer for the verification of information submitted by the inspection consumer to the public water supply custodian regarding cross-connection inspection results. The refusal of such information, when demanded, shall, within the discretion of the Superintendent of Water/Sewer be deemed evidence of the presence of improper connections as provided in this Chapter. (Ord. 520, 8-6-1997)

8-5-6: BACKFLOW PREVENTION DEVICES:

A. Determination: The owner or official custodian shall be responsible for protection of the public water supply system from contamination due to backflow or back-siphonage of contaminants through the customer's water service connection. If, in the judgment of the Superintendent of Water/Sewer or his authorized representative, an approved backflow prevention device is necessary for the safety of the public water supply system, the Superintendent of Water/Sewer shall give notice to the consumer to install such approved backflow prevention device at each service connection to the premises. The consumer shall immediately install such approved device or devices at his own expense; failure to install such device or devices immediately shall constitute grounds for discontinuing water service to the premises until such device or devices have been installed. The consumer shall retain records of installation, maintenance, testing and repair as required in subsection 8-5-9B4 of this Chapter for a period of at least five (5) years. The Superintendent of Water/Sewer may require the consumer to submit a cross-connection inspection report to the City to assist in determining whether or not service line protection will be required. All cross-connection inspections shall be conducted by a Cross-Connection Control Device Inspector certified by the Illinois Environmental Protection Agency.

B. Approval: All backflow prevention devices or methods required by these rules and regulations shall be approved by the Research Foundation for Cross-Connection Control of the University of Southern California, American Water Works Association, American Society of Sanitary Engineering, or American National Standards Institute or certified by the National Sanitation Foundation to be in compliance with applicable industry specification.

C. Installation: Installation of approved devices shall be made in accordance with the manufacturer's instructions. Maintenance as recommended by the manufacturer of the device shall be performed. Manufacturer's maintenance manual shall be available on-site.

D. Defective Devices: Whenever backflow prevention devices required by these regulations are found to be defective, they shall be repaired or replaced at the expense of the consumer

without delay as required by subsection 8-5-9D1 of this Chapter.

E. Disabling Devices: Backflow prevention devices shall not be bypassed, made inoperative, removed or otherwise made ineffective without specific authorization by the Superintendent of Water/Sewer. (Ord. 520, 8-6-1997)

8-5-7: WHERE PROTECTION IS REQUIRED:

A. An approved backflow device shall be installed on all connections to the public water supply as described in the Plumbing Code, 77 Illinois Administrative Code 890 and the Agency's regulations 35 Illinois Administrative Code 680. In addition, an approved backflow prevention device shall be installed on each service line to a consumer's water system serving premises, where in the judgment of the Superintendent of Water/Sewer, actual or potential hazards to the public water supply system exist.

B. An approved backflow prevention device shall be installed on each service line to a consumer's water system serving premises where the following conditions exist:

1. Premises having an auxiliary water supply, unless such auxiliary supply is accepted as an additional source by the Superintendent of Water/Sewer and the source is approved by the Illinois Environmental Protection Agency.
2. Premises on which any substance is handled which can create an actual or potential hazard to the public water supply system. This shall include premises having sources or systems containing process fluids or waters originating from the public water supply system which are no longer under the sanitary control of the Superintendent of Water/Sewer.
3. Premises having internal cross-connections that, in the judgment of the Superintendent of Water/Sewer and/or the Cross-Connection Control Device Inspector, are not correctable or intricate plumbing arrangements which makes it impractical to determine whether or not cross-connections exist.
4. Premises where, because of security requirements or other prohibitions or restrictions, it is impossible or impractical to make a complete cross-connection survey.
5. Premises having a repeated history of cross-connections being established or reestablished.

C. An approved backflow device shall be installed on all connections to the public water supply as described in the Plumbing Code, 77 Illinois Administrative Code 890 and the Agency's regulations 35 Illinois Administrative Code 653. In addition, an approved backflow prevention device shall be installed on each service line to the consumer's water system

serving, but not necessarily limited to, the following types of facilities unless the Superintendent of Water/Sewer determines that no actual or potential hazard to the public water supply system exists:

1. Hospitals, mortuaries, clinics, nursing homes.
2. Laboratories.

8-5-8: TYPE OF PROTECTION REQUIRED:

A. The type of protection required under subsection 8-5-7B1, B2 and B3 of this Chapter shall depend on the degree of hazard which exists as follows:

1. An approved fixed proper air gap separation shall be installed where the public water supply system may be contaminated with substances that could cause a severe health hazard.
2. An approved fixed proper air gap separation or an approved reduced pressure principle backflow prevention assembly shall be installed where the public water supply system may be contaminated with a substance that could cause a system or health hazard.
3. An approved fixed proper air gap separation or an approved reduced pressure principle backflow prevention assembly or a double check valve assembly shall be installed where the public water supply system may be polluted with substances that could cause a pollution hazard not dangerous to health.

B. The type of protection required under subsection 8-5-7B4 and B5 of this Chapter shall be an approved fixed proper air gap separation or an approved reduced pressure principle backflow prevention device.

C. Where a public water supply or an auxiliary water supply is used for a fire protection system, reduced pressure principle backflow preventers shall be installed on fire safety systems connected to the public water supply when:

1. The fire safety system contains antifreeze, fire retardant or other chemicals;
2. Water is pumped into the system from another source;
3. Water flows by gravity from a nonpotable source; or water can be pumped into the fire safety system from any other source;
4. There is a connection whereby another source can be introduced into the fire safety system.

D. All other fire safety systems connected to the potable water supply shall be protected by a double check valve assembly on metered service lines and a double detector check valve assembly on unmetered service lines. (Ord. 520, 8-6-1997)

8-5-9: CONSUMER'S RESPONSIBILITY:

A. Contamination: The consumer is responsible for back-siphoned material or contamination through backflow, if contamination of the potable water supply system occurs through an illegal cross-connection or an improperly installed, maintained or repaired device, or a device which has been bypassed, and must bear the cost of cleanup of the potable water supply system.

B. Prevent Backflow: It is the responsibility of the water consumer to prevent backflow into the public water system by ensuring that:

1. All cross-connections are removed; or approved cross-connection control devices are installed for control of backflow and back-siphonage.
2. Cross-connection control devices shall be installed in accordance with the manufacturer's instructions.
3. Cross-connection control devices shall be inspected at the time of installation and at least annually by a person approved by the Agency as a Cross-Connection Control Device Inspector (CCCDI). The inspection of mechanical devices shall include physical testing in accordance with the manufacturer's instructions.

4. Testing and records:

a. Each device shall be tested at the time of installation and at least annually or more frequently if recommended by the manufacturer.

b. Records submitted to the community public water supply shall be available for inspection by Agency personnel in accordance with 415 Illinois Compiled Statutes 5/4(e).

c. Each device shall have a tag attached listing the date of most recent test, name of CCCDI, and type and date of repairs.

d. A maintenance log shall be maintained and include:

- (6) Servicing performed and date completed.

C. Booster Pumps:

1. Where a booster pump has been installed on the service line to or within any premises, such pump shall be equipped with a low pressure cut-off device designed to shut off the booster pump when the pressure in the service line on the suction side of the pump drops to twenty (20) psi or less.

2. It shall be the duty of the water consumer to maintain the low pressure cut-off device in proper working order and to certify to the Superintendent of Water/Sewer, at least once a year, that the device is operable.

D. Inspection And Maintenance:

1. It shall be the duty of the consumer at any premises on which backflow prevention devices required by these regulations are installed to have inspections, tests, maintenance and repair made in accordance with the following schedule or more often where inspections indicate a need or are specified in manufacturer's instructions:

a. Fixed proper air gap separations shall be inspected to document that a proper vertical distance is maintained between the discharge point of the service line and the flood level rim of the receptacle at the time of installation and at least annually thereafter. Corrections to improper or bypassed air gaps shall be made within twenty four (24) hours.

b. Double check valve assemblies shall be inspected and tested at time of installation and at least annually thereafter, and required service performed within five (5) days.

c. Reduced pressure principle backflow prevention assemblies shall be tested at the time of installation and at least annually or more frequently if recommended by the manufacturer, and required service performed within five (5) days.

All cross-connection control or other plumbing inspections must be conducted in accordance with 225 Illinois Compiled Statutes 320/3. (Ord. 520, 8-6-1997)

8-5-10: TERMINATION OF SERVICE:

A. Termination With Notice: The Superintendent of Water/Sewer shall deny or discontinue, after reasonable notice to the occupants thereof, the water service to any premises wherein any backflow prevention device required by these regulations is not installed, tested, maintained and repaired in a manner acceptable to the Superintendent of Water/Sewer, or if it is found that the backflow prevention device has been removed or bypassed, or if an unprotected cross-connection exists on the premises, or if a low pressure cut-off required by these regulations is not installed and maintained in working order.

B. Emergency Termination Without Notice: Immediate disconnection with verbal notice can be effected when the Superintendent of Water/Sewer is assured that imminent danger of harmful contamination of the public water supply system exists. Such action shall be followed by written notification of the cause of disconnection. Immediate disconnection without notice to any party can be effected to prevent actual or anticipated contamination or pollution of the public water supply, provided that, in the reasonable opinion of the Superintendent of Water/Sewer or the Illinois Environmental Protection Agency, such action is required to prevent actual or potential contamination or pollution of the public water supply.

C. Neither the City, the Superintendent of Water/Sewer, or its agents or assigns shall be liable to any customers of the City for any injury, damages or lost revenues which may result from termination of said customer's water supply in accordance with the terms of this Chapter, whether or not said termination of the water supply was with or without notice. (Ord. 520, 8-6-1997)

8-5-12: VIOLATIONS:

A. Any person found to be violating any provision of this Chapter shall be served with written notice stating the violation and providing a reasonable time limit for the satisfactory correction thereof. The offender shall, within the period of time stated in such notice, permanently cease all violation.

B. Any person violating any of the provisions of this Chapter in addition to the fine provided, shall become liable to the City for any expense, loss or damage occasioned by the City by reason of such violation, whether the same was caused before or after notice. (Ord. 520, 8-6-1997)

STORM WATER MANAGEMENT

SECTION:

- 9-5--1: Purpose And Intent
- 9-5--2: Definitions
- 9-5--3: Application
- 9-5--4: Drainage Plan Drawings
- 9-5--5: Storm Water Runoff Release Rate
- 9-5--6: Collection Of Flows
- 9-5--7: Design Formula
- 9-5--8: Minimum Outlet Size
- 9-5--9: Storage Requirements
- 9-5-10: Detention Pond Design Criteria
- 9-5-11: Retention Pond Design Criteria
- 9-5-12: Maintenance Responsibilities
- 9-5-13: Penalties For Violation !2R!

9-5-1: PURPOSE AND INTENT:

It is the policy of the city to protect and promote the public health, safety and general welfare. The criteria for storm water management will reduce the possibility of damage to public and private property, will help to minimize erosion, will assist in the attainment and maintenance of water quality standards, and will preserve and enhance the environmental quality of the watercourses in the city. These criteria provide uniform procedures for designing and evaluating the design of storm water management systems.

The plan commission shall not recommend the approval of any plat unless, after consultation with the city engineer, they determine that the proposed provisions for storm water management are adequate. Drainage improvements shall be coordinated with existing and planned improvements elsewhere so as to form an integrated municipal system. The storm water drainage system shall be separate and independent of the sanitary sewer system. (Ord. 609, 11-7-2007)

9-5-2: DEFINITIONS:

The following definitions shall apply to the storm water management plan:

!DEF! BASE FLOOD: The flood generated by the 100-year storm.

DESIGN STORM: The 100-year storm.

DETENTION POND: See section 9-5-10 of this chapter.

EMERGENCY OVERFLOW SPILLWAY: In a detention/retention pond, a device or devices having at least the capacity for carrying the

peak inflow generated by the design storm. Activation of the emergency overflow/spillway occurs only when the excess storm water runoff exceeds the design storage capacity.

EXCESS STORM WATER RUNOFF: The difference between the storm water runoff from the design storm for the proposed site conditions and the storm water runoff from a 5-year storm for the undeveloped or existing site.

5-YEAR STORM: A precipitation event having a twenty percent (20.0%) chance of occurring in any given year.

FLOODPLAIN: That land area susceptible to being temporarily inundated by floodwater from an adjacent watercourse.

FLOODWAY: The channel of a river or other watercourse that must be reserved for passage of the base flood.

FREEBOARD: In a detention/retention pond, the vertical distance from the calculated maximum height of the water surface for the design storm to the lowest point of the top of the berm or containment wall.

IMPERVIOUS AREA: An area that will not appreciably absorb water, such as a parking lot, driveway, roof area, sidewalk, etc.

100-YEAR STORM: A precipitation event having a one percent (1.0%) chance of occurring in any given year.

PARKING LOT DETENTION: The use of parking lots for storm water detention. The following restrictions shall apply:

A. There should be no more than seven inches (7") of water depth in remote areas of the parking lot or four inches (4") in heavy traffic areas under design storm conditions.

B. The applicable provisions of other ordinances governing parking lot design and operation must be followed.

RETENTION POND: See section 9-5-11 of this chapter.

STORM WATER CHANNEL: A natural or manmade open watercourse with definite bed and banks, and which periodically or continuously contains moving water or forms a connecting link between two (2) bodies of water.

STORM WATER RUNOFF: That fraction of the water resulting from precipitation that flows from a given area of land during and immediately after a rainfall.

STORM WATER RUNOFF RELEASE RATE: The rate at which storm water runoff is released from dominant to servient land, the discharge rate from detention/retention facilities, or the sum of both types of discharges where applicable. (Ord. 609, 11-7-2007)

!DEFEND!

9-5-3: APPLICATION:

A. A combination of storage and controlled release of storm water runoff shall be required to be constructed and maintained in the following:

1. All residential subdivision developments within the corporate limits are subject to the provisions of the subdivision ordinance of the city of Assumption.

2. Commercial, business, office, and research developments.

3. Any planned unit development.

B. Developments less than two (2) acres with a proposed impervious area of less than thirty percent (30.0%), and developments generating less than one cubic foot per second (cfs) per acre of excess storm water runoff, shall not be required to provide detention/retention storage unless such flows will cause damage to, or exceed the capacity of, any downstream drainage facilities within the city of Assumption. (Ord. 609, 11-7-2007)

9-5-4: DRAINAGE PLAN DRAWINGS:

A. A drainage plan shall be filed with the preliminary plat for residential subdivisions and planned unit developments and shall be filed and approved prior to the issuance of a building permit for commercial, business, office and research developments.

B. The drainage plan shall include engineering drawings and supporting calculations describing the storm water drainage systems and environmental features for existing and proposed conditions.

C. The drainage plan shall show or contain the following:

1. Topographic survey of the property with contours at a minimum interval of two feet (2'), with spot elevations at key points when appropriate.

2. Banks and centerlines of streams and channels.

3. Shorelines of lakes, ponds and detention/retention basins.

4. Locations, sizes, and slopes of farm drains and tiles.

5. Subwatershed boundaries within the property and the property's location within the larger watershed.

6. Location, size, and slope of storm water conduits and drainage of water.

7. Locations, sizes, and slopes of sanitary sewers.
 8. Delineation of upstream and downstream drainage features and watersheds which might be affected by the development.
 9. Detention/retention areas and facilities.
 10. Roads, streets, inlets, and storm sewers.

 12. Site plan showing lots, public improvements, drainage easements, and building outlines.
 13. Base flood elevation and regulatory floodway where identified for the property.
 14. Drainage certificate signed by an Illinois licensed professional engineer and the owner of the development. The certificate must include language to the effect that the drainage of surface waters will not be adversely affected by this development, or that if change does occur, adequate provision has been made to protect adjoining property owners from damages which might result from such change in drainage.
- D. All computations, plans, and specifications related to the implementation of the drainage plan must be prepared and sealed by an Illinois licensed professional engineer. (Ord. 609, 11-7-2007)

9-5-5: STORM WATER RUNOFF RELEASE RATE:

A. The maximum allowable runoff shall be limited to:

1. The runoff that would occur during a 5-year storm under existing conditions for undeveloped sites.

2. For developed sites undergoing redevelopment or expansion:

a. If thirty percent (30%) or more of the impervious area is increased or modified, detention/retention must be provided for the entire site and outflow is not to exceed what would occur for a 5-year storm under predeveloped (natural) conditions. For example, if more than thirty percent (30%) of an area that will not appreciably absorb storm water, such as a parking lot or roof area, is increased, then a storm water detention/retention facility must be provided for the entire site to control and detain the excess storm water runoff so that it will not exceed that of a 5-year storm.

b. If less than thirty percent (30%) of the impervious area is increased or modified, the outflow shall not exceed what would occur for a 5-year storm under existing (current) conditions, and

detention/retention shall be required only for the area that is to be expanded or modified.

3. Under all circumstances, the storm water runoff release rate from a site shall be limited to such flows as will not cause damage or exceed the capacity of any downstream drainage facilities within the city of Assumption. (Ord. 609, 11-7-2007)

9-5-6: COLLECTION OF FLOWS:

All flows shall be collected on site using closed conduits, open channels, or both. Closed conduits shall be a minimum twelve inch (12") diameter pipe where access to a storm sewer is available. (Ord. 609, 11-7-2007)

9-5-7: DESIGN FORMULA:

The modified rational method will be used to compute storm water runoff unless the city council approves the use of another methodology. (Ord. 609, 11-7-2007)

9-5-8: MINIMUM OUTLET SIZE:

Where a single pipe outlet or orifice plate is to be used to control excess storm water runoff, it shall have a minimum diameter of six inches (6"). If the minimum size permits release rates greater than those specified, alternative outlet designs incorporating self-cleaning flow restrictors shall be used. (Ord. 609, 11-7-2007)

9-5-9: STORAGE REQUIREMENTS:

A. The design maximum storage to be provided in a detention/retention basin shall be based on the runoff generated by the design storm. Detention storage shall be computed using the modified rational method as outlined in chapter 12 of the Illinois department of transportation's "Drainage Manual".

B. The applicable regulations of the Illinois department of natural resources and the federal emergency management agency shall apply to all storage areas located in floodplains. (Ord. 609, 11-7-2007)

9-5-10: DETENTION POND DESIGN CRITERIA:

A. A detention pond is an area designated to temporarily store excess runoff with no permanent pool. Detention ponds shall incorporate the following design criteria:

1. A minimum two percent (2%) bottom slope or implementation of a low flow system or underdrain.

2. A low flow bypass system wherever feasible.
3. Location shall be at least one foot (1') from the property line.
4. Inner and outer embankment slopes shall have maximum grades of three to one (3:1).
5. Freeboard shall be a minimum of two feet (2') or fifty percent (50%) of the maximum pond depth, whichever is less.
6. Energy dissipation and/or erosion control for areas where velocities meet or exceed six feet (6') per second.
7. An emergency overflow/spillway.
8. Landscaping and multiple use shall be considered in all pond designs.
9. Subdivision detention ponds shall be incorporated into multiple properties to encourage maintenance or shall incorporate recreational use and be the responsibility of the homeowners' association.
10. Discharges shall be deposited directly into an approved storm sewer system where available.
11. Outfalls to ditches and open channels shall be designed to prevent erosion. If necessary, energy dissipation strategies shall be used to reduce outfall velocities to acceptable levels.
12. Detention facilities adjacent to a state highway may use IDOT design standards for storm water runoff release rates for all discharges to the highway drainage system. The developer shall obtain IDOT approval for such discharges, in addition to any approvals required from the city of Assumption.
13. Flows and storm water runoff from upstream areas outside the site should be based on the assumption that such areas are fully developed according to the latest available forecast land use patterns. (Ord. 609, 11-7-2007)

9-5-11: RETENTION POND DESIGN CRITERIA:

A. A retention pond may be used with permission of the city council. A "retention pond" shall be defined as an area with a permanent pool having sufficient capacity to store excess runoff and shall incorporate the following design criteria:

1. Outer embankment slopes shall have maximum grades of three to one (3:1), and inner embankment slopes to the pool area shall have maximum grades of five to one (5:1).
2. Freeboard shall be a minimum of two feet (2') or fifty percent (50%) of the height from the permanent pool to the maximum water

surface for the design storm, whichever is less.

3. The inner embankment shall have a shelf area along the sides of a minimum width of three feet (3').

4. The permanent pool area shall have a minimum depth of three feet (3') with a maximum depth of one foot (1') above the shelf area.

5. An emergency overflow/spillway.

6. Shall be designed so that as much flow as possible shall enter the pond through grass swales or sheet flow across grass areas.

7. Developer shall submit a maintenance plan for sediment removal and water quality control.

8. A structure capable of dewatering the pond within forty eight (48) hours.

9. Discharges shall be deposited directly into an approved storm sewer system where available.

10. Outfalls to ditches and open channels shall be designed to prevent erosion. If necessary, energy dissipation strategies shall be used to reduce outfall velocities to acceptable levels.

11. Retention facilities adjacent to a state highway may use IDOT design standards for storm water runoff release rates for all discharges to the highway drainage system. The developer shall obtain IDOT approval for such discharges, in addition to any approvals required from the city of Assumption.

12. Flows and storm water runoff from upstream areas outside the site should be based on the assumption that such areas are fully developed according to the latest available forecast land use patterns. (Ord. 609, 11-7-2007)

9-5-12: MAINTENANCE RESPONSIBILITIES:

A. Commercial Development: Maintenance of all structures, conduits, and pooling areas required to convey flow or provide detention/retention for the development shall be the responsibility of the owner to the point of its connection to the city's drainage system or its release onto right of way. A signed drainage covenant as provided by the city of Assumption shall be required prior to site plan approval.

B. Residential Development:

1. Detention/retention pond areas shall be a part of buildable lots and shall be maintained by adjacent residents. All conduits and structures shall be placed in easements and shall be the responsibility of the city.

2. Detention/retention pond areas not incorporated into buildable lots shall be designated as recreation areas and shall be the responsibility of a homeowners' association. Proof of homeowners' association requirements and responsibilities shall be submitted with the preliminary plat.

3. Regional detention/retention areas not incorporated into buildable lots and owned by the city shall be designated as public recreation areas and shall be the responsibility of the city of Assumption.

C. Privately Maintained Storm Water Systems; Inspection; Cost Of Corrective Action: All privately maintained storm water systems shall be subject to periodic inspection by the city or its representative to evaluate the condition and functioning of such systems. The cost of any corrective actions as determined by the city shall be the sole responsibility of the owner(s) of the system. Should the city be required to correct deficiencies in a privately maintained storm water system any costs incurred shall accrue to the owner(s). (Ord. 609, 11-7-2007)

9-5-13: PENALTIES FOR VIOLATION:

A. Violation of the provisions of this chapter, or failure to comply with any of its requirements, including conditions and safeguards established, shall constitute a misdemeanor. Each day such a violation continues shall be considered a separate offense.

B. Nothing herein contained shall prevent the city from taking such other lawful actions as is necessary to forbid or remedy any violations. All such costs connected therewith shall accrue to the person or persons responsible.

C. Any person who violates this chapter shall be subject to the penalty in section 1-4-1 of this code. (Ord. 609, 11-7-2007)

10-2-10: **PERMITS, APPLICATIONS; ADDITIONAL COSTS:**

Without regard to any other provision within the ordinances of the municipality the mayor, along with other municipal officials who may be authorized from time to time to do so, with prior written notice to the applicant, may retain outside consultants with established expertise in disciplines necessary to evaluate applications for annexation, zoning, subdivision and construction to assist the officials of the municipality, its committees and the corporate authorities in processing applications for municipal action or permission. The words "necessary or desirable" used here are not to be interpreted as referring to such measures as are absolutely and indispensably necessary, but includes all appropriate means which are conducive or adaptable to the end to be accomplished and which, in the judgment of the authorized official, will most advantageously permit the municipality to act upon the application or request.

The municipality shall disclose to the applicant or requesting party that it is utilizing such consulting services, and that party shall pay within thirty (30) days after the submission of an invoice from the consultant for the services provided. The services provided shall be reasonable and customary, and the invoices shall be itemized and shall be within a range generally chargeable by the consultants in performing similar services. It shall not be a defense to the payment of such invoices if the services, provided by consultants to the applicant itself, are provided at a lower pay range, so long as the services provided by outside consultants to municipalities within Christian County, Illinois, reflect similar fees as those submitted by the city's consultants. The intention of the corporate authorities is to utilize experienced and competent consultants to fairly assess the material they are asked to review with adequate time to provide excellent reports to the officials of the municipality who will then be able to reach fair decisions without prejudice or uncertainty.

In addition to establishing a system for the invoicing of consultant fees, the municipality itself may charge the reasonable cost for its own employees to process, analyze and report upon the application or request. The ordinances of the municipality may, from time to time, contain standardized fees for an application process, which is similar in the complexity of the request and of the needed municipal review. For any application or permit process not governed by a standard fee, the provisions of this section shall prevail. A copy of the provisions of this section may be included as part of the application process for any permit or application for which a standard fee has not been established. If an applicant or permittee has received an invoice from the municipality which has a due date payable prior to the date at which the municipality will be asked to act upon the application or permit, the date of actions may be delayed until the amounts due and payable have been paid. The municipality may require the posting of an irrevocable letter of credit to guarantee that payments will be promptly made. The municipality may require a certified check or the posting of an irrevocable letter of credit to guarantee fees and consultant costs already incurred, but not paid, at the time the application or permit is acted upon. Any permit or application, which has been granted, may be suspended during any period of time when payments are in

arrears. (Ord. 575, 12-1-2004)

B. Special Use Provision: This is a special use in R-1 and must be approved by the Zoning Board after a public hearing. (Ord. 503, 2-7-1996)

10-6-2: RULES:

IMMOBILIZED MOBILE HOME: Any structure resting on a permanent foundation with wheels, tongue and hitch permanently removed. The City Council establishes the following criteria to complete the immobilization of a mobile home:

- A. The foundation shall extend into the ground below the frost line so as to attach and become a part of the real estate. Materials such as concrete, mortared concrete block or mortared brick extending into the ground below the frost line shall satisfy the requirement for a permanent foundation.

B. As an alternate to subsection A of this definition, piers may be used, extending into the ground below the front line, and sufficient in number to properly support the mobile home.

C. To complete the immobilization, wheels, tongue and hitch must be permanently removed. Axles may be removed.

MOBILE HOME: A structure designed for permanent habitation and so constructed as to permit its transport on wheels, temporarily or permanently attached to its frame, from the place of its construction to the location, or subsequent locations, at which it is intended to be permanent habitation and designed to permit the occupancy thereof as a dwelling place for one or more persons; provided, that any such structure resting on a permanent foundation, with wheels, tongue and hitch permanently removed, shall not be construed as a "mobile home", but shall be an "immobilized mobile home". A mobile home should not be confused with a camping trailer or recreational vehicle.

MOBILE HOME LOT: A parcel of land designated for the exclusive use of the occupants of a single mobile home; also termed mobile home space.

MOBILE HOME PARK: An area of land divided into two (2) or more lots with foundations platted and laid out to provide sites for mobile homes. The mobile home park area should include any building or structure, fixture or equipment that is used or intended to be used in connection with providing that accommodation, including provisions for sewer, water, electric and any other similar facilities required to permit occupancy of such mobile homes parked thereon.

PERSON: Any individual, firm, trust, corporation, association or partnership. (Ord. 503, 2-7-1996) !DEFEND!

10-6-4: STANDARDS:

C. Anchorage Of Mobile Homes: All mobile homes shall be anchored in an approved manner at each corner of the structure to gain maximum protection against high velocity winds.

D. Height Regulations: No building, structure or dwelling in a mobile home park should exceed one and one-half ($1\frac{1}{2}$) stories or twenty five feet (25') in height.

E. Yard Regulations: The mobile home spaces will not be located any closer to the bounding property lines of the park than the appropriate yard requirements that the district would allow.

F. Dwelling Standards: Every mobile home dwelling hereafter placed upon a mobile home lot should have a total ground floor area of not less than four hundred (400) square feet, measured from the outside of exterior walls, including utility rooms, but excluding open porches, breezeways and garages. Each site shall be provided with a cold water tap located in accordance as per regulations of the Department of Public Health.

B. Sewage Disposal:

1. Mobile home parks shall be served by a public sewer system or by a private central collection and treatment system. The development of a private central collection and treatment system to serve the mobile home park shall be made only after plans and specifications for the central collection and treatment system have been approved by the Department of Public Health. All sewage disposal apparatus, including appurtenances thereto, shall be provided, maintained and operated so as not to create a nuisance or health hazard.

2. Each site shall be provided with a sewer connection for the combined liquid waste outlet or outlets of each mobile home. It shall be the duty of the owner or operator of said park to provide an approved type of water and odor tight connection from the mobile home water drainage to the sewer connection and it shall be the duty of said owner or operator to make such connection and keep all occupied mobile homes, connected to said sewer while located in the parks.

3. Sewer connections in unoccupied sites shall be so closed that they will emit no odors or cause a breeding place for flies. No water or waste shall be allowed to fall on the ground from a mobile home.

C. Solid Waste Disposal:

1. A sufficient number of adequate flyproof and waterproof containers shall be supplied for the storage of garbage except when an adequate incinerator, approved by the Environmental Protection Agency, is provided.

2. Garbage containers shall be emptied at least once a week and shall not be filled to overflowing, or allowed to become foul smelling or a breeding place for insects. Garbage and rubbish shall be disposed of in a manner which creates neither a nuisance nor a menace to health and which is approved by the Department of Public Health.

D. Fuel Supply And Storage: All handling and storage of natural gas, liquefied petroleum gas (LPG), fuel oil, or other flammable liquid or gases should be installed and maintained in accordance with applicable State and local government codes and regulations. The Illinois Department of Law Enforcement (Division of Fire Prevention) is the regulatory State agency for safe fuel storage and handling systems and the applicable regulations are the National Fire Protection Association Standards. No LPG or fuel oil container shall be placed inside or beneath any mobile home, storage cabinet, carport, or any other structure unless such arrangement is approved by the appropriate authority. Containers of fuel shall be at least five feet (5') from any mobile home door or exits, and placed on stands constructed of noncombustible material. (Ord. 503, 2-7-1996)

10-6-6: MAINTENANCE AND OPERATION REGULATIONS:

Each mobile home park shall be provided with a custodian's office where each mobile home entering such park shall be assigned to a site, given a copy of the park rules and registered according to the prescribed form. Such registration shall include the name of such mobile home and the square feet of floor space contained in such mobile home. Such registration shall also include the license number of each mobile home and of the towing vehicle, if there be any, and the state issuing such licenses. The register shall be signed by the owner or operator of the mobile home. Any person furnishing misinformation for purposes of registration shall be deemed guilty of a misdemeanor and punishable under the general statutes for such offense. The registration records shall be neatly and securely maintained, and no registration records shall be destroyed until six (6) years have elapsed following the date of registration. The register shall be available at all times for inspection by all law enforcement officers and by the Department of Public Health. (Ord. 503, 2-7-1996)

10-6-8: ANNUAL FEE:

The annual fee for a license to operate a mobile home park shall be fifty dollars (\$50.00) payable before January 1 of the year. Mobile homes already legally allowed into the City shall be required to abide by all prior rules and regulations with regard thereto including the necessity of proper skirting and other rules and practices. If a petition is presented as aforesaid, the City Council shall act upon such request and revise the rules and regulations pertinent to such prior to allowance of additional mobile homes, but in any event within ninety (90) days of such petition. (Ord. 519, 8-6-1997)

CHAPTER 7

ZONING BOARD OF APPEALS

SECTION:

10-7-1: Creation, Membership And Compensation
10-7-2: Appeals
10-7-3: Powers
10-7-4: Removal Of Members
10-7-5: Conflict Of Interest
10-7-6: Meetings
10-7-7: Penalties !2R!

10-7-1: CREATION, MEMBERSHIP AND COMPENSATION:

A. A board of appeals is hereby established. The board shall consist of seven (7) members to be appointed by the mayor with the approval of the city council. The members of the board shall serve as follows: for the initial appointments, one for one year; one for two (2) years; one for three (3) years; one for four (4) years; one for five (5) years; one for six (6) years; one for seven (7) years. Successors to each member so appointed shall serve for a term of five (5) years. One of the members so appointed shall be named chairman at the time of his appointment. The mayor has the power to remove any member of the board for cause, after notice and after public hearing. Vacancies shall be filled for the unexpired term of the member whose place has become vacant. (Ord. 503, 2-7-1996)

B. Each member of the appeals board shall be entitled to be paid twenty five dollars (\$25.00) per day of meeting(s) regarding hearings on appeals to zoning matters. Only one pay amount shall apply regardless of the number of meetings held during that day's session(s). (Ord. 561, 12-3-2003)

10-7-2: APPEALS:

A. An appeal to the board may be taken by any person aggrieved by any order, requirement, decision or determination by any governmental officer, department, board, or bureau based in whole or in part upon the provision of this chapter.

B. An appeal shall be filed with the zoning board within twenty (20) days of the action appealed from. Upon appeal the zoning board chairman shall immediately transmit to the board papers constituting the record upon which the action appealed from was taken. An appeal stays all proceedings in furtherance of the action appealed unless the chairman certifies to the board that a stay might cause imminent peril to life or property. The board shall fix a reasonable time for the hearing of the appeal at a public hearing.

C. The concurring vote of four (4) members of the board is

necessary to reverse any order or requirement, or to decide in favor of the applicant. (Ord. 503, 2-7-1996)

10-7-3: POWERS:

A. Interpretation: To hear and decide appeals where it is alleged that there is an error in any action by the zoning enforcing officer or other administrative official in carrying out the provisions of the chapter, and for interpretation of the zoning maps.

B. Variations: To hear and decide on applications for a variation in cases where there are practical difficulties or particular hardship in the way of carrying out the provisions of this chapter. Before any variation is granted the board must make a finding of fact that all of the following conditions are shown to be present:

1. The property in question cannot yield a reasonable return if permitted to be used only under the conditions allowed by the regulations in that zone; and
2. The plight of the owner is due to unique circumstances; and
3. Variation, if granted, will not alter the essential character of the locality.

A variation may be permitted only if the evidence, in the judgment of the board, sustains each of the three (3) conditions enumerated. A decision of the board shall be subject to review, reversal or modification by the city council at the initiation of the mayor. (Ord. 503, 2-7-1996)

C. Conditions And Safeguards: In granting a variation the board may attach thereto any conditions and safeguards it deems necessary or desirable in furthering the purposes of this chapter. Violation of any of these conditions or safeguards shall be deemed a violation of this chapter. (Ord. 582, 8-3-2005)

D. Fees: In order to partially defray the expenses of public hearings involving variations, the applicant shall pay the sum of one hundred seventy five dollars (\$175.00) plus publication fees to the city clerk at the time of filing of the appeal for the variance. (Ord. 563, 1-7-2004)

10-7-4: REMOVAL OF MEMBERS:

Any member of the board who shall miss three (3) consecutive meetings without being excused by the chairman of the board shall forfeit his office. The chairman shall advise the mayor that a vacancy exists, and the vacancy shall thereafter be filled. (Ord. 503, 2-7-1996)

10-7-5: CONFLICT OF INTEREST:

A. One of the most troublesome conditions is the frequency with which members of the board of appeals have direct or indirect interest in matters which come before the board. The possibility of a conflict of interest arises because matters coming before the board are local in character and board members may reside in or near the neighborhood of the property that is the subject of a proceeding before the board.

B. It is absolutely imperative that a member who has any interest in a matter before the board disqualify himself. Not only should he refrain from participating in any vote, but he should also remove himself from any meeting or hearing prior to the vote. Thus, a petition by a relative or business associate should prompt a board member to disqualify himself. Where a member has any doubt as to his objectivity, he should decide in favor of disqualification. Nothing damages public confidence in the action of the board more seriously or risks court reversal of the board's action more than does a decision which appears to be influenced by personal interest on the part of a member or members of the board of appeals. (Ord. 503, 2-7-1996)

10-7-6: MEETINGS:

A. There shall be an annual meeting of the board of appeals held during the month of June each year at city hall. The exact date and time of such meeting shall be determined by the mayor after consultation with the chairman of the zoning board. The date of the meeting shall be posted at city hall and published in a newspaper of local circulation at least twenty (20) days in advance of such meeting. Other meetings of the board of appeals may be held at such other time(s) and place(s) as the board of appeals or mayor may determine. Special meetings may be held at the call of the chairman, or as determined by the board of appeals. Such chairman, or in the chairman's absence, the acting chairman, may administer oaths and compel attendance of witnesses. All meetings of the board of appeals shall be open to the public. (Ord. 508, 9-4-1996)

B. CHAPTER 9

AGRICULTURAL DISTRICT

SECTION:

- 10-9-1: Purpose
- 10-9-2: Permitted Uses
- 10-9-3: Accessory Uses

10-9-1: **PURPOSE:**

The regulations for the Agriculture District are intended to govern the use of the land and buildings and structures, and the uses thereof within the areas of the City where soil, topographic and other conditions are best adapted to the pursuit of agriculture. These regulations are also intended to provide for the protection, conservation, and utilization of natural resources; to preserve the value of existing and future open space recreation facilities; to prevent or minimize conflicts between agricultural and non-agricultural land uses, and to provide for low density residential development in areas where such development is compatible with agricultural uses. It is essential that scattered, indiscriminate urban development within areas best suited for agriculture be precluded and that orderly urban development be facilitated. It is hereby declared the intent and purpose of this section that land in the City which is productive should remain in productivity for agricultural purposes until such time as the natural growth of the City precludes preservation thereof. It is further the declared intent that single-family dwellings, or any residential use, be limited since the primary purpose of dwellings in agriculture zoned lands should be subservient to and in connection with the productivity of said lands. It is further expressly noted that the frequency of parcels of land less than two (2) acres in size used for agricultural purposes is minimal; that the greater preponderance of parcels used for productive agricultural purposes exceed two (2) acres in size. It is acknowledged however, that some lands, because of topographical or other unusual conditions may be properly used for limited residential purposes, and pursuant thereto isolated residential zoning may be allowed. (Ord. 745, 10-2-2019)

10-9-2: **PERMITTED USES:**

Permitted Uses:

- A. Agricultural.

October 2020

- B. Display of equipment for sale by a licensed retailer.
- C. Single-family residential use, provided it is:
 - 1. A single-family dwelling on a zoning lot zoned as Residential R-1.
 - 2. Residential structures existing on zoning lots classified as Agricultural A-1 on the date of adoption of this chapter. (Ord. 745, 10-2-2019)

10-9-3: **ACCESSORY USES:**

Accessory Uses: Those customarily accessory to the pursuit of agriculture, provided that structures for the shelter of livestock, poultry, and other farm animals shall be located not less than one hundred feet (100') from a lot line. (Ord. 745, 10-2-2019)

CHAPTER 10
